DEPARTMENT OF BACHELOR OF SCIENCE INFORMATION TECHNOLOGY

HANDBOOK

PREPARED BY:

Ms. PRAJAKTA JOSHI (Course Co-ordinator)

1.1. ABOUT THE PROGRAMME Introduction and Objectives

INTRODUCTION

The University of Mumbai started the Bachelor in Science in Information Technology program in 1999-2000.Bachelor of Science (Information Technology) was one of the few programs initiated by the University of Mumbai. The program to cater to the growing needs of corporate India also leads to the all-round development of their personality.

The program takes the students beyond computer skills to telecommunication systems and Networking to e-commerce, internet security and Enterprise Resource Planning. This program will give a strategic advantage to the future Indian Manager.

With the growing use of Computers and Information Technology in our day to day life, necessitates trained man power to manufacture, maintain and use the Computers as well as write the software required for the effective and efficient use of the computers and IT.

Thus, if you have the zest and the endurance to face challenges, the passion to succeed and win and also to commit yourself to building a challenging career in Accounts & Finance with an international outlook, BMS is a program specially designed for you.

OBJECTIVES

- 1. To create employable graduate in Information technology which will enable the industry to grow and the graduates to become successful in the field of Information Technology.
- 2. To create for the students of the University of Mumbai an additional avenue of self-employment and also to benefit Industry by providing them with suitably trained persons in the field of Computers and Information Technology.
- 3. To prepare students to exploit opportunities in IT related area of interest.
- 4. To create a new genre of skilled manpower capabilities to face challenges in Information Technology.

5. To bridge the gap and produce employable graduate in Information technology which will enable the industry to grow and graduates to become successful in the field of Information Technology.

2.1. ELIGIBILITY CRITERION FOR ADMISSION TO THE PROGRAMME:

The Eligibility criterion for admission to the First Year of Bachelor in Science in Information Technology **Program as per O 5151 & 5053 of the University of Mumbai is:**

- A candidate for being eligible for admission to the Bachelor in Science in Information Technology Degree Program shall have passed XII Std. Examination of the Maharashtra Board of Higher Secondary Education **OR** its equivalent examination with Mathematics as one of the subjects by secured not less than 45% marks in aggregate in one attempt (General Category) and 40 % of marks in aggregate in one attempt (Reserved Category). **OR**
- 2. Passed three year (post) SSC Diploma in Computer Engineering/Computer Science/Computer Technology/Information Technology/Electrical, Electronics & Video Engineering and allied branches. However, the Diploma should be recognized by the Board of Technical education or recognized by any other government body. Minimum marks required is 45% marks in aggregate in one attempt (General Category) and 40 % of marks in aggregate in one attempt (Reserved Category).
 - OR
- Civil and allied branches of engineering are eligible for direct admission to the SECOND YEAR of the B.Sc.IT degree program with 45% marks in aggregate in one attempt (General Category) and 40 % of marks in aggregate in one attempt (Reserved Category).
- 4. Every candidate admitted to the degree program in the constituent /affiliated college / recognized institution, conducting the program, shall have to register himself/herself with the University.

PLEASE NOTE THAT NO ENTRANCE EXAMINATIONS IS PRESCRIBED BY THE UNIVERSITY OF MUMBAI FOR ADMISSION TO THE PROGRAMME. THE ADMISSION TO THE PROGRAMME IS PURELY ON THE BASIS OF THE MARKS OBTAINED AT THE XII STD OR ITS EQUIVALENT EXAMINATION.

3.1 DURATION OF THE PROGRAMME:

B.Sc.IT is a THREE (03) year FULL TIME Undergraduate Degree Program offered by University of Mumbai comprising SIX (06) Semesters. Each year is divided into TWO (02) semesters.

4.1 PROGRAMME CONTENT:

Overall the program comprises of 40 courses (papers / subjects) each of 100 marks. Broadly the programs are on, Management, Law, Economics, Financial Accounting, Information Technology and Quantitative Methods. *Detail contents are given in the next section*.

5.1EVALUATION AND ASSESSMENT:

For every program (subject) the evaluation / assessment of the student will comprise of two components: Internal Assessment (25% of total marks 25 marks) which will be continuous evaluation and Semester End Examination which will be a theory paper of 75% of the marks for the program (subject) i.e. 75 marks. To pass in the program (subject/paper) the learner (student) is required to obtain 40% marks individually in each of the two components i.e. Internal Assessment (i.e. 10 marks out of 25 marks) and Semester End Examination (30 marks out of 75 marks) separately and overall 40% of the total marks (40 marks out of 00 marks). *Refer to the Scheme of Examination for details.*

6.1 BRIEF CURRICULUM

Bachelor of Management Studies (BMS) is a 3 years full time Program offered by University of Mumbai. Each year is divided into 2 semesters. The course consists of 40 modules comprising 40 theory papers and no project. This is one of the few Self Financing Courses which does not have project as one paper.

7.1 DETAILED SYLLABUS

Imperative Programming

| inperative | e Programming | |
|------------|--|----------------|
| Unit I | Introduction: Types of Programming languages, History, features and application. Simple program logic, program development cycle, pseudocode statements and flowchart symbols, sentinel value to end a program, programming and user environments, evolution of programming models, desirable program characteristics. Fundamentals: Structure of a program. Compilation and Execution of a Program, Character Set, identifiers and keywords, data types, constants, variables and arrays, declarations, expressions, statements, Variable definition, symbolic constants | 12 Lectures |
| Unit II | Operators and Expressions: Arithmetic operators, unary operators, relational and logical operators, assignment operators, assignment operators, the conditional operator, library functions. Data Input and output: Single character input and output, entering input data, scanf function, printf function, gets and puts functions, interactive programming | 12 Lectures |
| Unit III | Conditional Statements and Loops: Decision Making Within A Program, Conditions, Relational Operators, Logical Connectives, If Statement, If-Else Statement, Loops: While Loop, Do While, For Loop. Nested Loops, Infinite Loops, Switch Statement Functions: Overview, defining a function, accessing a function, passing arguments to a function, specifying argument data types, unction prototypes, recursion, modular programming and functions, standard library of c functions, prototype of a function: foo1lal parameter list, return type, function call, block structure, passing arguments to a function: call by reference, call by value | 12 Lectures |
| Unit IV | Program structure:Storage classes, automatic variables, external variables, staticvariables, multifile programs, more library functions,Preprocessor: Features, #define and #include, Directives andMacrosArrays:Definition, processing, passing arrays to functions, | 12 Lectures |
| Unit V | multidimensional arrays, arrays and strings Pointers: Fundamentals, declarations, Pointers Address Operators, Pointer Type Declaration, Pointer Assignment, Pointer | 12 Lectures |

Initialization, Pointer Arithmetic, Functions and Pointers, Arrays and Pointers, Pointer Arrays, passing functions to other functions Structures and Unions: Structure Variables, Initialization, Structure Assignment, Nested Structure, Structures and Functions, Structures and Arrays: Arrays of Structures, Structures Containing Arrays, Unions, Structures and pointers

111

| 1. | Basic Programs: |
|----|--|
| a. | Write a program to display the message HELLO WORLD. |
| b. | Write a program to declare some variables of type int, float and double. Assign some values to these variables and display these values. |
| c. | Write a program to find the addition, subtraction, multiplication and division of two numbers. |
| | |
| 2. | Programs on variables: |
| a. | Write a program to swap two numbers without using third variable. |
| b. | Write a program to find the area of rectangle, square and circle. |
| c. | Write a program to find the volume of a cube, sphere, and cylinder. |
| 3. | Conditional statements and loops(basic) |
| a. | Write a program to enter a number from the user and display the month name. If number >13 then display invalid input using switch case. |
| b. | Write a program to check whether the number is even or odd. |
| c. | Write a program to check whether the number is positive, negative or zero. |
| d. | Write a program to find the factorial of a number. |
| e. | Write a program to check whether the entered number is prime or not. |
| f. | Write a program to find the largest of three numbers. |

| 4. | Conditional statements and loops(advanced) | | | | | | |
|-----|---|--|--|--|--|--|--|
| a. | Write a program to find the sum of squares of digits of a number. | | | | | | |
| b. | Write a program to reverse the digits of an integer. | | | | | | |
| c. | Write a program to find the sum of numbers from 1 to 100. | | | | | | |
| d. | Write a programs to print the Fibonacci series. | | | | | | |
| e. | Write a program to find the reverse of a number. | | | | | | |
| f. | Write a program to find whether a given number is palindrome or not. | | | | | | |
| g. | Write a program that solve the quadratic equation | | | | | | |
| | $x = \frac{-b \pm \sqrt{b^2 - 4ac}}{2a}$ | | | | | | |
| h. | Write a program to check whether the entered number is Armstrong or not. | | | | | | |
| i. | Write a program to count the digit in a number | | | | | | |
| | Dr. Contraction of the | | | | | | |
| 5. | Programs on patterns: | | | | | | |
| a. | Programs on different patterns. | | | | | | |
| - 1 | 0 77 | | | | | | |
| 6. | Functions: | | | | | | |
| a. | Programs on Functions. | | | | | | |
| - | | | | | | | |
| 7. | Recursive functions | | | | | | |
| a. | Write a program to find the factorial of a number using recursive function. | | | | | | |
| b. | Write a program to find the sum of natural number using recursive function. | | | | | | |
| 8 | 2 | | | | | | |
| 8. | Arrays | | | | | | |
| a. | Write a program to find the largest value that is stored in the array. | | | | | | |
| b. | Write a program using pointers to compute the sum of all elements stored in an | | | | | | |
| 1 | array. | | | | | | |
| с. | Write a program to arrange the 'n' numbers stored in the array in ascending and descending order. | | | | | | |
| d. | Write a program that performs addition and subtraction of matrices. | | | | | | |
| e. | Write a program that performs multiplication of matrices. | | | | | | |
| 12 | | | | | | | |
| 9. | Pointers | | | | | | |
| a. | Write a program to demonstrate the use of pointers. | | | | | | |
| b. | Write a program to perform addition and subtraction of two pointer variables. | | | | | | |
| | -0° | | | | | | |
| 10. | Structures and Unions | | | | | | |
| a. | Programs on structures. | | | | | | |
| b. | Programs on unions. | | | | | | |

| Digital | Electronics | |
|------------------|--|----------------|
| Unit I | Number System: Analog System, digital system, numbering system, binary number system, octal number system, hexadecimal number system, conversion from one number system to another, floating point numbers, weighted codes binary coded decimal, non-weighted codes Excess – 3 code, Gray code, Alphanumeric codes – ASCII Code, EBCDIC, ISCII Code, Hollerith Code, Morse Code, Teletypewriter (TTY), Error detection and correction, Universal Product Code, Code conversion. Binary Arithmetic: Binary addition, Binary subtraction, Negative number representation, Subtraction using 1's complement and 2's complement, Binary multiplication and division, Arithmetic in octal number system, Arithmetic in hexadecimal number system, BCD and Excess – 3 | 12 Lectures |
| UNIT TO WOTHER S | Arithmetic Boolean Algebra and Logic Gates: Introduction, Logic (AND OR NOT), Boolean theorems, Boolean Laws, De Morgan's Theorem, Perfect Induction, Reduction of Logic expression using Boolean Algebra, Deriving Boolean expression from given circuit, exclusive OR and Exclusive NOR gates, Universal Logic Gates Implementation of other gates using universal gates, Input bubbled logic, Assertion level. Minterm, Maxterm and Karnaugh Maps: Introduction, minterms and sum of minterm form, maxterm and Product of maxterm form, Reduction technique using Karnaugh maps -2/3/4/5/6 variable K-maps, Grouping of variables in K- maps, K-maps for product of sum form, minimize Boolean expression using K-map and obtain K-map from Boolean | 12 Lectures |
| Unit III | expression, Quine McCluskey Combinational Logic Circuits: Introduction, Multi-input, multi-output Combinational circuits, Code converters design and implementations Arithmetic Circuits: Introduction, Adder, BCD Adder, Excess – 3 Adder, Binary Subtractors, BCD Subtractor, Multiplier, Comparator. | 12 Lectures |
| Unit IV | Multiplexer, Demultiplexer, ALU, Encoder and Decoder: Introduction, Multiplexer, Demultiplexer, Decoder, ALU, Encoders. Sequential Circuits: Flip-Flop: Introduction, Terminologies used, S-R flip-flop, D flip-fop, JK flip flop, Race-around condition, Master – slave JK flip-flop, T flip-flop conversion from one type of flip-flop to another, Application of flip flops | 12 Lectures |
| Unit V | Counters: | 12 |

Introduction, Asynchronous counter, Terms related to
counters, IC7493 (4-bit binary counter), Synchronous
counter, Bushing, Type T Design, Type JK Design, Presettable
counter, IC 7490, IC 7492,
Synchronous counter ICs, Analysis of counter circuits.
Shift Register: Introduction, parallel and shift registers, serial
shifting, serial-in serial-out, serial-in parallel-out ,
parallel-in parallel-out, Ring counter, Johnson counter,
Applications of shift registers, Pseudo-random binary
sequence generator, IC7495, Seven Segment displays,
analysis of shift counters.Lectures

| List of 1 | Practical |
|-----------|--|
| 1. | Study of Logic gates and their ICs and universal gates: |
| a. | Study of AND, OR, NOT, XOR, XNOR, NAND and NOR gates |
| b. | IC 7400, 7402, 7404, 7408, 7432, 7486, 74266 |
| с. | Implement AND, OR, NOT, XOR, XNOR using NAND gates. |
| d. | Implement AND, OR, NOT, XOR, XNOR using NOR gates. |
| | |
| 2. | Implement the given Boolean expressions using minimum number of gates. |
| a. | Verifying De Morgan's laws. |
| b. | Implement other given expressions using minimum number of gates. |
| с. | Implement other given expressions using minimum number of ICs. |
| 3. | Implement combinational circuits. |
| a. | Design and implement combinational circuit based on the problem given and minimizing using K-maps. |
| | |
| 4. | Implement code converters. |
| a. | Design and implement Binary – to – Gray code converter. |
| b. | Design and implement Gray – to – Binary code converter. |
| с. | Design and implement Binary – to – BCD code converter |

| d. | Design and implement Binary – to – XS-3 code converter |
|-----|--|
| 5. | Implement Adder and Subtractor Arithmetic circuits. |
| a. | Design and implement Half adder and Full adder. |
| b. | Design and implement BCD adder. |
| с. | Design and implement $XS - 3$ adder. |
| d. | Design and implement binary subtractor. |
| e. | Design and implement BCD subtractor. |
| f. | Design and implement $XS - 3$ subtractor. |
| 6. | Implement Arithmetic circuits. |
| a. | Design and implement a 2-bit by 2-bit multiplier. |
| b. | Design and implement a 2-bit comparator. |
| 0. | |
| 7. | Implement Encode and Decoder and Multiplexer and Demultiplexers. |
| a. | Design and implement 8:3 encoder. |
| b. | Design and implement 3:8 decoder. |
| с. | Design and implement 4:1 multiplexer. Study of IC 74153, 74157 |
| d. | Design and implement 1:4 demultiplexer. Study of IC 74139 |
| e. | Implement the given expression using IC 74151 8:1 multiplexer. |
| f. | Implement the given expression using IC 74138 3:8 decoder. |
| 1 | |
| 8. | Study of flip-flop <mark>s and counters.</mark> |
| a. | Study of IC 7473. |
| b. | Study of IC 7474. |
| с. | Study of IC 7476. |
| d. | Conversion of Flip-flops. |
| e. | Design of 3-bit synchronous counter using 7473 and required gates. |
| f. | Design of 3-bit ripple counter using IC 7473. |
| 2 | |
| 9. | Study of counter ICs and designing Mod-N counters. |
| a. | Study of IC 7490, 7492, 7493 and designing mod-n counters using these. |
| b. | Designing mod-n counters using IC 7473 and 7400 (NAND gates) |
| 2 | |
| 10. | Design of shift registers and shift register counters. |
| a. | Design serial – in serial – out, serial – in parallel – out, parallel – in serial – out, |
| | parallel – in parallel – out and bidirectional shift registers using IC 7474. |
| b. | Study of ID 7495. |
| | Implementation of digits using seven segment displays. |

F.Y.B.Sc. IT Semester II

| Object O | riented Programming | |
|----------|--|----------------|
| Unit I | Object Oriented Methodology: Introduction, Advantages and Disadvantages of Procedure Oriented Languages, what is Object Oriented? What is Object Oriented Development? Object Oriented Themes, Benefits and Application of OOPS. Principles of OOPS: OOPS Paradigm, Basic Concepts of OOPS: Objects, Classes, Data Abstraction and Data Encapsulation, Inheritance, Polymorphism, Dynamic Binding, Message Passing | 12 Lectures |
| Unit II | Classes and Objects: Simple classes (Class specification, class members accessing), Defining member functions, passing object as an argument, Returning object from functions, friend classes, Pointer to object, Array of pointer to object. Constructors and Destructors: Introduction, Default Constructor, Parameterized Constructor and examples, Destructors Using <style> tag, Inline style information. </td><td>12 Lectures</td></tr><tr><td>Unit III</td><td> Polymorphism: Concept of function overloading, overloaded operators, overloading unary and binary operators, overloading comparison operator ,overloading arithmetic assignment operator ,Data Conversion between objects and basic types, Virtual Functions: Introduction and need, Pure Virtual Functions, Static Functions, this Pointer, abstract classes, virtual destructors, onSubmit, onUnload </td><td>12 Lectures</td></tr><tr><td>Unit IV</td><td>ProgramdevelopmentusingInheritance:Introduction,Understandinginheritance,Advantagesprovided by inheritance,choosingthe access specifier,Derived class declaration,derivedclassconstructors,class hierarchies,multiple inheritance,multipleinheritance,containership,hybrid inheritance.ExceptionHandling:Introduction,ExceptionHandlingConcept of throw & catch with example</td><td>12 Lectures</td></tr><tr><td>Unit V</td><td>Templates: Introduction, Function Template and examples, Class Template and examples. Working with Files: Introduction, File Operations, Various File Modes, File Pointer and their Manipulation</td><td>12 Lectures</td></tr></tbody></table></style> | |

| 1. | Classes and methods |
|-----|--|
| a. | Designanemployeeclassforreadinganddisplayingtheemployeeinformation,the getInfo() and displayInfo() methods will be used respectively. Where getInfo() will be private method |
| b. | Design the class student containing getData() and displayData() as two of its method which will be used for reading and displaying the student information respectively. Where getData() will be private method. |
| c. | Design the class Demo which will contain the following methods: readNo(), factorial() for calculating the factorial of a number, reverseNo() will reverse the given number, isPalindrome() will check the given number is palindrome, isArmstrong() which will calculate the given number is armStrong or not.Where readNo() will be private method. |
| d. | Write a program to demonstrate function definition outside class and accessing class members in function definition. |
| 2. | Using friend functions. |
| a. | Write a friend function for adding the two complex numbers, using a single class |
| | |
| b. | Write a friend function for adding the two different distances and display its sur using two classes. |
| 0 | |
| с. | Write a friend function for adding the two matrix from two different classes and display its sum. |
| 100 | |
| 3. | Constructors and method overloading. |
| a. | Design a class Complex for adding the two complex numbers and also show the use of constructor. |
| b. | Design a class Geometry containing the methods area() and volume() and also overload the area() function . |
| c. | Design a class StaticDemo to show the implementation of static variable and static function. |
| 4. | Operator Overloading |
| a. | Overload the operator unary (-) for demonstrating operator overloading. |
| b. | Overloadtheoperator+foraddingthetimingsoftwoclocks,Andalsopassobjects as an argument. |
| с. | Overload the + for concatenating the two strings. For e.g "Py" + "thon" = Python |
| 5. | Inheritance |
| a. | Design a class for single level inheritance using public and private type derivation |
| b. | Design a class for multiple inheritance. |
| с. | Implement the hierarchical inheritance. |
| | |

| a. | Implement the concept of method overriding. | |
|-----|--|------|
| b. | Show the use of virtual function | |
| c. | Show the implementation of abstract class. | |
| 7. | String handling | |
| a. | String operations for string length, string concatenation | |
| b. | String operations for string reverse, string comparison, | |
| c. | Console formatting functions. | |
| 8. | Exception handling | |
| a. | Show the implementation of exception handling | |
| b. | Show the implementation for exception handling for strings | |
| с. | Show the implementation of exception handling for using the pointers. | |
| | | |
| 9. | File handling | |
| a. | Design a class FileDemo open a file in read mode and display the total number words and lines in the file. | er o |
| b. | Design a class to handle multiple files and file operations | |
| с. | Design a editor for appending and editing the files | 2 |
| ~ | | 0 |
| 10. | Templates | 20 |
| a. | Show the implementation for the following | 1 |
| b. | Show the implementation of template class library for swap function. | 2.5 |
| c. | Design the template class library for sorting ascending to descending and vice | e- |
| 8 | Versa | 5 |
| 3 | | 1 |

| Micropr | ocessor Architecture | .00 |
|---------|--|----------|
| Unit I | Microprocessor, microcomputers, and Assembly Language: | 12 |
| | Microprocessor, Microprocessor Instruction Set and Computer | Lectures |
| | Languages, From Large Computers to Single-Chip Microcontrollers, | |
| | Applications. | |
| | Microprocessor Architecture and Microcomputer System: | |
| | Microprocessor Architecture and its operation's, Memory, I/O | |
| | Devices, Microcomputer System, Logic Device | |
| | Interfacing, Microprocessor-Based System Application. | |
| | 8085 Microprocessor Architecture and Memory Interface: | |
| | Introduction, 8085 Microprocessor unit, 8085-Based microcomputer, | |
| | Memory Interfacing, Interfacing the 8155 Memory Segment, | |
| | Illustrative Example: Designing Memory for the MCTS Project, | |
| | Testing and Troubleshooting Memory Interfacing Circuit, 8085- | |
| | BasedSingle-Board microcomputer. | |
| Unit II | Interfacing of I/O Devices | 12 |
| | Basic Interfacing concepts, Interfacing Output Displays, Interfacing | Lectures |

| | Input Devices, Memory Mapped I/O, Testing and Troubleshooting I/O Interfacing Circuits. Introduction to 8085 Assembly Language Programming: The 8085 Programming Model, Instruction Classification, Instruction, Data and Storage, writing assembling and Execution of a simple program, Overview of 8085 Instruction Set, Writing and Assembling Program. Introduction to 8085 Instructions: Data Transfer Operations, Arithmetic Operations, Logic Operation, Branch Operation, Writing Assembly Languages Programs, Debugging | |
|-------------|--|----------------|
| | a Program. | |
| Unit III | ProgrammingTechniqueswithAdditionalInstructions:ProgrammingTechniques:Looping,Counting and Indexing,AdditionalDataTransfer and 16-BitArithmetic Instructions,ArithmeticInstruction Related to Memory, Logic Operations: Rotate,LogicsOperations:Compare, Dynamic Debugging.Counters and TimeDelays:Counters and TimeDelays,IllustrativeProgram:HexadecimalCounter,IllustrativePrograms.Stacks and Sub-Routines:Stack,Subroutine,Restart,ConditionalCall,ReturnReturnInstructions, | 12 Lectures |
| - Alexandre | Advanced Subroutine concepts. | 6 |
| Unit IV | Code Conversion, BCD Arithmetic, and 16-Bit Data Operations: BCD-to-Binary Conversion, Binary-to-BCD Conversion, BCD-to- Seven-Segment-LED Code Conversion, Binary-to-ASCII and ASCII- to-Binary Code Conversion, BCD Addition, BCD Subtraction, Introduction To Advanced Instructions and Applications, Multiplication, Subtraction With Carry. Software Development System and Assemblers: Microprocessors-Based Software Development system, Operating System and Programming Tools, Assemblers and Cross-Assemblers, Writing Program Using Cross Assemblers. Interrupts: The 8085 Interrupt, 8085 Vectored Interrupts, Restart as S/W Instructions, Additional I/O Concepts and processes. | 12 Lectures |
| Unit V | The Pentium and Pentium Pro microprocessors: Introduction, Special Pentium registers, Memory management, Pentium instructions, Pentium Pro microprocessor, Special Pentium Prefectures. Core 2 and later Microprocessors: Introduction, Pentium II software changes, Pentium IV and Core 2, i3, i5 and i7. SUN SPARC Microprocessor: Architecture, Register file, data types and instruction format | 12 Lectures |

| List of P | ractical |
|-----------|---|
| 1. | Perform the following Operations related to memory locations. |
| a. | Store the data byte 32H into memory location 4000H. |
| b. | Exchange the contents of memory locations 2000H and 4000H |
| | 6 × 5. |
| 2. | Simple assembly language programs. |
| a. | Subtract the contents of memory location 4001H from the memory location 2000H and place the result in memory location 4002H. |
| b. | Subtract two 8-bit numbers. |
| с. | Addthe16-bitnumberinmemorylocations4000Hand4001Htothe16-bitnumber in |
| COL | memory locations 4002H and 4003H. The most significant eight bits of the two numberstobeaddedareinmemorylocations4001Hand4003H.Storetheresultin memorylocations4004Hand4005Hwiththemostsignificantbyteinmemory location 4005H. |
| d. | Add the contents of memory locations 40001H and 4001H and place the result in the memory locations 4002Hand 4003H. |
| e. | Subtract the 16-bit number in memory locations 4002H and 4003H from the 16-bit |
| | number in memory locations 4000H and 4001H. The most significant eight bits of |
| | the two numbers are in memory locations 4001H and 4003H. Store the result in |
| e. | memory locations 4004H and 4005H with the most significant byte in memory location 4005H. |
| f. | Find the l's complement of the number stored at memory location 4400H and store the complemented number at memory location 4300H. |
| g. | Find the 2's complement of the number stored at memory location 4200H and store the complemented number at memory location 4300H. |
| | |
| 3. | Packing and unpacking operations. |
| a. | PackthetwounpackedBCDnumbersstoredinmemorylocations4200Hand4201H and store result in memory location 4300H. Assume the least significant digit is stored at 4200H. |
| b. | Two-digit BCD number is stored in memory location 4200H. Unpack the BCD |
| | number and store the two digits in memory locations 4300H and 4301H such that memory location 4300H will have lower BCD digit. |
| | |
| 4. | Register Operations. |
| a. | Write a program to shift an eight-bit data four bits right. Assume that data is in register C. |
| b. | Program to shift a 16-bit data 1 bit left. Assume data is in the HL register pair |
| | |

| ĥ | White a measure to count number of the in the contents of D maister and store the |
|----------|--|
| d. | Write a program to count number of l's in the contents of D register and store the count in the B register. |
| 5. | Multiple memory locations. |
| a. | Calculate the sum of series of numbers. The length of the series is in memory location4200 Hand the series begins from memory location 4201H.a. Consider the sum to be 8bitnumber.So, ignorecarries.Storethesumatmemorylocation4300H. b. Consider the sum to be 16 bit number. Store the sum at memory locations 4300H and 4301H |
| b. | Multiply two 8-bit numbers stored in memory locations 2200H and 2201H by repetitive addition and store the result in memory locations 2300H and 2301H. |
| c. | Divide 16-bit number stored in memory locations 2200H and 2201H by the 8 bit number stored at memory location 2202H. Store the quotient in memory locations 2300H and 2301H and remainder in memory locations 2302H and 2303H. |
| d. | Find the number of negative elements (mostsignificantbit1) in a block of data. The length of the block is in memory location 2200H and the block itself begins in memorylocation2201H.Storethenumberofnegativeelementsinmemorylocation 2300H |
| e. | Find the largest number in a block of data. The length of the block is in memory location 2200H and the block itself starts from memory location 2201H. Store the |
| ~ | Maximum num berinmemorylocation2300H.Assume that the number sin the block are all 8-bitunsigned binary numbers. |
| 1 | are an 8-ontunsigned officially numbers. |
| 6. | Calculations with respect to memory locations. |
| a. | Write a program to sort given 10 numbers from memory location 2200H in the ascending order. |
| b. c. | Calculate the sum of series of ven numbers from the list of numbers. The length of the list is in memory location 2200H and the series itself begins from memory location 2201H. Assume the sum to be 8 bit number so you can ignore carries and store the sum at memory location 2Sample problem: Calculate the sum of series of odd numbers from the list of numbers. The length of the list is in memory location 2200H and the series itself begins from memory |
| | location 2201H. Assume the sum to be 16-bit. Store the sum at memory locations 2300H and 2301H. |
| d. | Find the square of the given numbers from memory location 6100H and store the result from memory location 7000H |
| e. | Search the given byte in the list of 50 numbers stored in the consecutive memory locations and store the address of memory location in the memory locations 2200H and 2201H.AssumebyteisintheCregisterandstartingaddressofthelist is 2000H. If byte is not found store 00 at 2200H and 2201H |
| f. | Two decimal numbers six digits each, are stored in BCD package form. Each number occupies a sequence of byte in the memory. The starting address of first numberis6000HWriteanassemblylanguageprogramthataddsthesetwonumbers and stores the sum in the same format starting from memory location 6200H |
| g. | Add2arrayshavingten8-bitnumber search and generate third array of result. It is necessary to add the first element of array 1 with the first element of array-2 and so on.Thestartingaddressesofarrayl,array2andarray3are2200H,2300Hand 2400H, respectively |
| 7. | Assembly programs on memory locations. |
| - | |

| a. | Write an assembly language program to separate even numbers from the given list of 50 numbers and store them in another list starting from 2300H. Assume |
|-------|--|
| | starting address of 50 number list is 2200H |
| b. | Write assembly language program with proper comments for the following: |
| υ. | A block of data consisting of 256 bytes is stored in memory starting at 3000H. |
| | This block is to be shifted (relocated) in memory from 3050H onwards. Do not shift |
| | |
| 2 | the block or part of the block anywhere else in the memory. |
| с. | Add even parity to a string of 7-bit ASCII characters. The length of the string is in |
| | memory location 2040H and the string itself begins in memory location 2041H. |
| 1 | Place even parity in the most significant bit of each character. |
| d. | A list of 50 numbers is stored in memory, starting at 6000H. Find number of |
| | negative, zero and positive numbers from this list and store these results in memory |
| | locations 7000H, 7001H, and 7002H respectively |
| e. | Write an assembly language program to generate fibonacci number. |
| f. | Program to calculate the factorial of a number between 0 to 8. |
| 0 | |
| 8. | String operations in assembly programs. |
| a. | Write an 8085-assembly language program to insert a string of four characters from |
| 14 | the tenth location in the given array of 50 characters |
| b. 🚬 | Write an 8085-assembly language program to delete a string of 4 characters from |
| ~ | the tenth location in the given array of 50 characters. |
| c. | Multiplythe8-bitunsignednumberinmemorylocation2200Hbythe8-bitunsigned |
| 0 | number in memory location 2201H. Store the 8 least significant bits of the result in |
| | memory location 2300H and the 8 most significant bits in memory location 2301H. |
| d. | Divide the 16-bit unsigned number in memory locations 2200H and 2201H (most |
| | significant bits in 2201H) by the B-bit unsigned number in memory location 2300H |
| 2.4.2 | store the quotient in memory location 2400H and remainder in 2401H |
| е. | DAA instruction is not present. Write a sub routine which will perform the same |
| 0. | task as DAA. |
| Mar (| |
| 9. | Calculations on memory locations. |
| a. | TotestRAMbywriting'1'andreadingitbackandlaterwriting'0'(zero)andreading |
| U. | it back. RAM addresses to be checked are 40FFH to 40FFH. In case of any error, it |
| | is indicated by writing 01H at port 10 |
| b. | Arrange an array of 8-bit unsigned no in descending order |
| с. | Transfer ten bytes of data from one memory to another memory block. Source |
| | memory block starts from memory location 2200H whereas destination memory |
| | block starts from memory location 2300H |
| d. | Write a program to find the Square Root of an 8-bit binary number. The binary |
| | number is stored in memory location 4200H and store the square root in 4201H. |
| e. | Write a simple program to Split a HEX data into two nibbles and store it in memory |
| | |
| 10. | Operations on BCD numbers. |
| a. | Add two 4-digit BCD numbers in HL and DE register pairs and store result in |
| | memory locations, 2300H and 2301H. Ignore carry after 16 bits. |
| b. | Subtract the BCD number stored in E register from the number stored in the D |
| | Register |
| с. | Write an assembly language program to multiply 2 BCD numbers |
| | |

| Web Te | echnology | |
|-------------------|--|----------------|
| A COLLES | Internet and the World Wide Web: What is Internet? Introduction to internet and its applications, E-mail, telnet, FTP, e-commerce, video conferencing, e-business. Internet service providers, domain name server, internet address, World Wide Web (WWW): World Wide Web and its evolution, uniform resource locator (URL), browsers–internet explorer, Netscape navigator, opera, Firefox, chrome, Mozilla. Search engine, webserver–apache ,IIS, proxy server, HTTP protocol HTML5: Introduction, Why HTML5? Formatting text by using tags, using lists and backgrounds, Creating hyperlinks and anchors. Style sheets, CSS formatting text using style sheets, formatting paragraphs using style sheets. | 12 Lectures |
| Unit II HARA S | HTML5 Page layout and navigation: Creating navigational aids: planning site organization, creating text- based navigation bar, creating graphics based navigation bar, creating graphical navigation bar, creating image map, redirecting to another URL, creating division based layouts: HTML5 semantic tags, creating divisions, creating HTML5semanticlayout, positioning and formatting divisions. HTML5 Tables, Forms and Media: Creating tables: creating simple table, specifying the size of the table, specifying the width of the column ,merging table cells, using tables for page layout, formatting tables: applying table borders, applying background and foreground fills, changing cell padding, spacing and alignment, creating user forms: creating basic form, using check boxes and option buttons, creating lists, additional input types in HTML5, Incorporating sound and video: audio and video in HTML5, HTML multimedia basics, embedding video clips, incorporating audio on webpage. | 12 Lectures |
| Unit III | Java Script: Introduction, Client-Side JavaScript, Server-Side JavaScript, JavaScript Objects, JavaScript Security, Operators: Assignment Operators, Comparison Operators, Arithmetic Operators, % (Modulus), ++(Increment),(Decrement), - (Unary Negation), Logical Operators, Short-Circuit Evaluation, String Operators, Special Operators, ?: (Conditional operator), , (Comma operator), delete, new, this, void | 12 Lectures |

| | Statements: Break, comment, continue, delete, dowhile, export, | |
|---------------|---|----------|
| | for, forin, function, ifelse, import, labelled, return, switch, var, | |
| | while, with, | |

| 1. | Use of Basic Tags |
|----------|---|
| a. | Design a web page using different text formatting tags. |
| b. | Design a web page with links to different pages and allow navigation between |
| 0. | web pages. |
| с. | Design a web page demonstrating all Style sheet types |
| С. | Design a web page demonstrating an style sheet types |
| 2. | Image maps, Tables, Forms and Media |
| 2. a. | Design a web page with Image maps. |
| b. | Design a web page demonstrating different semantics |
| | Design a web page with different tables. Design a webpage using table so that |
| c. | the content appears well placed. |
| d. | Design a web page with a form that uses all types of controls. |
| | Design a web page embedding with multimedia features. |
| e. | Design a web page embedding with multimedia features. |
| 2 | |
| 3. | Java Script |
| a. | Using JavaScript design, a web page that prints factorial/Fibonacci series/any |
| 1 | given series. |
| b. | Design a form and validate all the controls placed on the form using Java Script. |
| c. | Write a JavaScript program to display all the prime numbers between 1 and 100. |
| a. | Write a JavaScript program to accept a number from the user and display the sum |
| 0 | of its digits. |
| d. | Write a program in JavaScript to accept a sentence from the user and display the |
| u. | number of words in it. (Do not use split () function). |
| 9 | Write a java script program to design simple calculator. |
| е. | while a java script program to design simple calculator. |
| 4 | Control and loaning statements and Java Sovint references |
| 4. | Control and looping statements and Java Script references |
| a. | Design a web page demonstrating different conditional statements. |
| b. | Design a web page demonstrating different looping statements. |
| c. | Design a web page demonstrating different Core JavaScript references (Array, |
| | Boolean, Date, Function, Math, Number, Object, String, regExp). |
| 1 | |
| 5. | Basic PHP I |
| a. | Write a PHP Program to accept a number from the user and print it factorial. |
| b. | WriteaPHPprogramtoacceptanumberfromtheuserandprintwhetheritisprime |
| | or not. |
| | Sec. |
| 6. | Basic PHP II |
| a. | Write a PHP code to find the greater of 2 numbers. Accept the no. from the user. |
| b. | Write a PHP program to display the following Binary Pyramid: |
| 0. | 1 |
| | |
| | |
| | $ \begin{array}{cccccccccccccccccccccccccccccccccccc$ |
| | |
| 7 | String Functions and annous |
| 7. | String Functions and arrays |
| a. | Write a PHP program to demonstrate different string functions. |
| b. | Write a PHP program to create one dimensional array. |

| 8. | PHP and Database |
|-----|--|
| a. | Write a PHP code to create: |
| | Create a database College |
| | • Create a table Department (Dname, Dno,Number_Of_faculty) |
| b. | Write a PHP program to create a database named "College". Create a table named |
| | "Student" with following fields (sno, sname, percentage). Insert 3 records of your |
| | choice. Display the names of the students whose percentage is between 35 to75 |
| | in a tabular format. |
| с. | Design a PHP page for authenticating a user. |
| | ND COMMP |
| 9. | Email |
| a. | Write a program to send email with attachment. |
| | |
| 10. | Sessions and Cookies |
| a. | Write a program to demonstrate use of sessions and cookies. |
| | |

|----------------------|--|
| b. | Program for iterative calculation |
| | |
| C | Program to calculate the roots of a quadratic equation using the formula. |
| <u> </u> | Program to evaluate <i>e</i> ^{<i>x</i>} using infinite series. |
| | |
| 2. | Solution of algebraic and transcendental equations: |
| a. | Program to solve algebraic and transcendental equation by bisection method. |
| b. | Program to solve algebraic and transcendental equation by false position method. |
| с. | Program to solve algebraic and transcendental equation by Secant method. |
| d. | Program to solve algebraic and transcendental equation by Newton Raphson method. |
| 4 | method. |
| 2 | Internalation |
| | Interpolation |
| a. | Program for Newton's forward interpolation. |
| b. | Program for Newton's backward interpolation. |
| c. | Program for Lagrange's interpolation. |
| - Miles | |
| 4. | Solving linear system of equations by iterative methods |
| a. | Program for solving linear system of equations using Gauss Jordan method. |
| b. | Program for solving linear system of equations using Gauss Seidel method. |
| and the second | |
| 5. | Numerical Differentiation |
| a. | Programing to obtain derivatives numerically. |
| 1 | |
| 6. | Numerical Integration |
| a. | Program for numerical integration using Trapezoidal rule. |
| b. | Program for numerical integration using Simpson's 1/3 rd rule. |
| с. | Program for numerical integration usingSimpson's3/8 th rule. |
| | |
| 7. | Solution of differential equations |
| a. | Program to solve differential equation using Euler's method |
| b. | Program to solve differential equation using modified Euler's method. |
| с. | Program to solve differential equation using Runge-kutta 2 nd order and 4 th order |
| | methods. |
| 8. | Regression |
| a. | Program for Linear regression. |
| b. | Program for Polynomial Regression. |
| с. | Program for multiple linear regression. |
| d. | Program for non-linear regression. |

| 9. | Random variables and distributions |
|-----|---|
| a. | Program to generate random variables. |
| b. | Program to fit binomial distribution. |
| с. | Program to fit Poisson distribution. |
| | |
| 10. | Distributions |
| a. | Program for Uniform distribution. |
| b. | Program for Bernoulli distribution |
| с. | Program for Negative binomial distribution. |

| Project a | and Viva Voce |
|-----------|--|
| 1. | A project should be done based on the objectives of Green Computing. Report |
| | minimum 50 pages should be prepared. The report should have a font size of 12, |
| | Times new roman and 1.5 line spacing. The headings should have font |
| | size 14. The report should be hard bound. |
| 2. | The project can be done individually or a group of two students. |
| 3. | The students will have to present the project during the examination. |
| 4. | A certified copy of the project report is essential to appear for the examination. |

| List of Pra | actical |
|-------------|---|
| 1. | Write the progr <mark>am for the following:</mark> |
| a. | Create a program that asks the user to enter their name and their age. Print out a message addressed to them that tells them the year that they will turn 100 years Old. |
| b. | Enter the number from the user and depending on whether the number is even or odd, print out an appropriate message to the user. |
| с. | Write a program to generate the Fibonacci series. |
| d. | Write a function that reverses the user defined value. |
| e. | Write a function to check the input value is Armstrong and also write the function for Palindrome. |
| f. | Write a recursive function to print the factorial for a given number. |
| 100 | |
| 2. | Write the prog <mark>ram for the</mark> following: |
| a. | Write a function that takes a character (i.e. a string of length 1) and returns True if it is a vowel, False otherwise. |
| b. | Define a function that computes the <i>length</i> of a given list or string. |
| c. | Define a <i>procedure</i> histogram () that takes a list of integers and prints a histogram to the screen. For example, histogram ([4, 9, 7]) should print the following: |
| 3. | Write the program for the following: |
| a. | A <i>pangram</i> is a sentence that contains all the letters of the English alphabet at least once, for example: <i>The quick brown fox jumps over the lazy dog</i> . Your task here is to write a function to check a sentence to see if it is a pangram or not. |

| h | Take a list say for axample this one: |
|--------|---|
| b. | Take a list, say for example this one: |
| | a=[1,1,2,3,5,8,13,21,34,55,89] |
| | |
| | and write a program that prints out all the elements of the list that are less than 5. |
| | |
| | |
| 4. | Write the program for the following: |
| a. | Write a program that takes two lists and returns True if they have at least one common member. |
| b. | Write a Python program to print a specified list after removing the 0th, 2nd, 4 th |
| | and 5th elements. |
| с. | Write a Python program to clone or copy a list |
| | 0° |
| 5. | Write the program for the following: |
| a. | Write a Python script to sort (ascending and descending) a dictionary by value. |
| b. | Write a Python script to concatenate following dictionaries to create a new one. |
| 1 | Sample Dictionary: |
| | dic1={1:10, 2:20} |
| 6 | dic2={3:30, 4:40} |
| 1 | dic3={5:50,6:60} |
| \sim | Expected Result : {1: 10, 2: 20, 3: 30, 4: 40, 5: 50, 6: 60} |
| с. | Write a Python program to sum all the items in a dictionary. |
| 100 | |
| 6. | Write the program for the following: |
| a. | Write a Python program to read an entire text file. |
| b. | Write a Python program to append text to a file and display the text. |
| с. | Write a Python program to read last n lines of a file. |
| nh. | |
| 7. | Write the program for the following: |
| a. | Design a class that store the information of student and display the same |
| b. | Implement the concept of inheritance using python |
| с. | Create a class called Numbers, which has a single class attribute called MULTIPLIER, |
| | and a constructor which takes the parameters x and y (these should all be numbers). |
| | i Write a method called add which returns the sum of the attributes x and y . |
| | i Write a class method called multiply, which takes a single number |
| | parameter a and returns the product of a and MULTIPLIER. |
| | i Write a static method called subtract, which takes two number parameters, b and |
| | c, and returns b -c. |
| | $\dot{\mathbf{x}}$ Write a method called value which returns a tuple containing the values of x and |
| | y. Make this method into a property, and write a setter and a delete for |
| | manipulating the values of x and y . |
| | |
| 8. | Write the program for the following: |
| 0. | write the program for the following. |

| a. | Open a new file in IDLE ("New Window" in the "File" menu) and save it as |
|-----|--|
| | geometry.py in the directory where you keep the files you create for this course. Then |
| | copy the functions you wrote for calculating volumes and areas in the "Control Flow |
| | and Functions" exercise into this file and save it. |
| | Now open a new file and save it in the same directory. You should now be able |
| | to import your own module like this: |
| | |
| | import geometry |
| | Try and add print dir. (geometry) to the file and run it. |
| | Now write a function pointy ShapeVolume(x, y, squareBase) that calculates the volume |
| | of a square pyramid if squareBase is True and of a right circular cone if squareBase is |
| | False. x is the length of an edge on a square if squareBase is True and the radius of a |
| | circle when squareBase is False. y is the height of the object. First use squareBase to |
| 12 | distinguish the cases. Use the circleArea and squareArea from the geometry module to |
| | calculate the base areas. |
| b. | Write a program to implement exception handling. |
| 1 | |
| 9. | Write the progra <mark>m for the following:</mark> |
| a. | Try to configure the widget with various options like: bg="red", family="times", size=18 |
| b. | Try to change the widget type and configuration options to experiment with other |
| 143 | widget types like Message, Button, Entry, Checkbutton, Radiobutton, Scale etc. |
| | |
| 10. | Design the database applications for the following: |
| a. | Design a simple database application that stores the records and retrieve the same. |
| b. | Design a database application to search the specified record from the database. |
| с. | Design a database application to that allows the user to add, delete and modify the records. |
| | |

| | |

| List of P | ractical |
|-----------|---|
| 1. | Implement the following: |
| a. | Write a program to store the elements in 1-D array and perform the operations like searching, sorting and reversing the elements. [Menu Driven] |
| b. | Read the two arrays from the user and merge them and display the elements in sorted order.[Menu Driven] |
| с. | Write a program to perform the Matrix addition, Multiplication and Transpose Operation. [Menu Driven] |
| 14 | |
| 2. | Implement the following for Linked List: |
| a. | Write a program to create a single linked list and display the node elements in reverse order. |
| b. | Write a program to search the elements in the linked list and display the same |
| с. | Write a program to create double linked list and sort the elements in the linked list. |
| - | |
| 3. | Implement the following for Stack: |
| a. | Write a program to implement the concept of Stack with Push, Pop, Display and Exit operations. |
| b. | Write a program to convert an infix expression to postfix and prefix conversion. |
| с. | Write a program to implement Tower of Hanoi problem. |
| - 200 | |
| 4. | Implement the following for Queue: |
| a. | Write a program to implement the concept of Queue with Insert, Delete, Display and Exit operations. |
| b. | Write a program to implement the concept of Circular Queue |
| с. | Write a program to implement the concept of Deque. |
| 5. | Implement the following sorting techniques: |
| a. | Write a program to implement bubble sort. |
| b. | Write a program to implement selection sort. |
| с. | Write a program to implement insertion sort. |
| 6. | Implement the following data structure techniques: |
| a. | Write a program to implement merge sort. |
| b. | Write a program to search the element using sequential search. |
| | Write a program to search the element using binary search. |
| 7. | Implement the following data structure techniques: |
| a. | Write a program to create the tree and display the elements. |

| b. | Write a program to construct the binary tree. |
|----------|---|
| с. | Write a program for inorder, postorder and preorder traversal of tree |
| | |
| 8. | Implement the following data structure techniques: |
| a. | Write a program to insert the element into maximum heap. |
| b. | Write a program to insert the element into minimum heap. |
| | |
| 9. | |
| <i>.</i> | Implement the following data structure techniques: |
| a. | Implement the following data structure techniques: Write a program to implement the collision technique. |
| | |
| a. | Write a program to implement the collision technique. |
| a. | Write a program to implement the collision technique. |
| a. b. | Write a program to implement the collision technique. Write a program to implement the concept of linear probing. |

| List of Pi | ractical |
|------------|---|
| 1. | Java Basics |
| a. | Write a Java program that takes a number as input and prints its multiplication table up to 10. |
| b. | Write a Java program to display the following pattern. ***** **** *** *** *** * |
| с. | Write a Java program to print the area and perimeter of a circle. |
| 2. | Use of Operators |
| a. | Write a Java program to add two binary numbers. |
| b. | Write a Java program to convert a decimal number to binary number and vice versa. |
| c. | Write a Java program to reverse a string. |

| 3. | Java Data Types |
|----------|--|
| a. | Write a Java program to count the letters, spaces, numbers and other characters of an |
| | input string. |
| b. | Implement a Java function that calculates the sum of digits for a given char array |
| | consisting of the digits '0' to '9'. The function should return the digit sum as a long |
| | value. |
| c. | Find the smallest and largest element from the array |
| 4. | Methods and Constructors |
| a. | Designed a class Sort Data that contains the method asec() and desc(). |
| b. | Designed a class that demonstrates the use of constructor and destructor. |
| с. | Write a java program to demonstrate the implementation of abstract class. |
| 0. | |
| 5. | Inheritance |
| | Write a java program to implement single level inheritance. |
| a. b. | Write a java program to implement method overriding |
| | |
| с. | Write a java program to implement multiple inheritance. |
| 1 | S - 7 |
| 6. | Packages and Arrays |
| a. | Create a package, Add the necessary classes and import the package in java class. |
| b. | Write a java program to add two matrices and print the resultant matrix. |
| c. | Write a java program for multiplying two matrices and print the product for the same. |
| 1 | |
| 7. | Vectors and Multithreading |
| a. | Write a java program to implement the vectors. |
| b. | Write a java program to implement thread life cycle. |
| c. | Write a java program to implement multithreading. |
| | white a java program to implement manufactured ang. |
| 8. | File Handling |
| 1.00 | |
| a. | Write a java program to open a file and display the contents in the console window. |
| b. | Write a java program to copy the contents from one file to other file. |
| c. | Write a java program to read the student data from user and store it in the file. |
| | 9. |
| 9. | GUI and Exception Handling |
| a. | Design an AWT program to print the factorial for an input value. |
| b. | Design an AWT program to perform various string operations like reverse string, |
| ~. | string concatenation etc. |
| c. | Write a java program to implement exception handling. |
| 10. | GUI Programming. |
| | Design an AWT application that contains the interface to add student information |
| a. | And display the same. |
| | |
| h | |
| b. c. | Design a calculator based on AWT application. Design an AWT application to generate result marks sheet. |

| List of Pr | actical |
|------------|---|
| 1. | Solve the following: |
| a. | Study and enlist the basic functions used for graphics in C / C++ / Python |
| | language. Give an example for each of them. |
| b. | Draw a co-ordinate axis at the center of the screen. |
| | |
| 2. | Solve the following: |
| a. | Divide your screen into four region, draw circle, rectangle, ellipse and half ellipse |
| | in each region with appropriate message. |
| b. | Draw a simple hut on the screen. |
| | ND COMP |
| 3. | Draw the following basic shapes in the center of the screen : |
| | i. Circle ii. Rectangle iii. Square iv. Concentric Circles v. Ellipse vi. Line |
| | |
| 4. | Solve the following: |
| a. | Develop the program for DDA Line drawing algorithm. |
| b. | Develop the program for Bresenham's Line drawing algorithm. |
| _ | |
| 5. | Solve the following: |
| a. | Develop the program for the mid-point circle drawing algorithm. |
| b. | Develop the program for the mid-point ellipse drawing algorithm. |
| - 0 | Colors the fallensing of |
| 6. | Solve the following: |
| a. | Write a program to implement 2D scaling. |
| b. | Write a program to perform 2D translation |
| 3 | |
| 7. | Solve the following: |
| a. | Perform 2D Rotation on a given object. |
| b. | Program to create a house like figure and perform the following operations. |
| 2 | i. Scaling about the origin followed by translation. |
| 977 | ii. Scaling with reference to an arbitrary point. |
| | iii. Reflect about the line $y = mx + c$. |
| | |
| 8. | Solve the following: |
| a. | Write a program to implement Cohen-Sutherland clipping. |
| b. | Write a program to implement Liang - Barsky Line Clipping Algorithm |
| 0. | while a program to imprement Liang Datoky Line empping ringermini |
| 9. | Solve the following: |
| a. | Write a program to fill a circle using Flood Fill Algorithm. |
| b. | Write a program to fill a circle using Boundary Fill Algorithm. |
| | |
| 10. | Solve the following: |
| a. | Develop a simple text screen saver using graphics functions. |
| b. | Perform smiling face animation using graphic functions. |
| с. | Draw the moving car on the screen. |

| | Management, Managing the Allocation of Resources within Programmes, | |
| | Strategic Programme Management, Creating a Programme, Aids to | |
| | Programme Management, Some Reservations about Programme | |
| | Management, Benefits Management. An Overview of Project Planning: | |
| | Introduction to Step Wise Project Planning, Step 0: Select Project, Step 1: | |
| | Identify Project Scope and Objectives, Step 2: Identify Project Infrastructure, | |
| | Step 3: Analyze Project Characteristics, Step 4: Identify Project Products and | |
| | Activities, Step 5: Estimate Effort for Each Activity, Step 6: Identify Activity | |
| | Risks, Step 7: Allocate Resources, Step 8: Review/Publicize Plan, Steps 9 and | |
| | 10: Execute Plan/Lower Levels of Planning | |
| Unit II | Selection of an Appropriate Project Approach: Introduction, Build or Buy? | 12Lectures |
| | Choosing Methodologies and Technologies, Software Processes and Process | |
| | Models, Choice of Process Models, Structure versus Speed of Delivery, The | |

Compiled by Ms. Prajakta Joshi (Course Co-ordinator) L. S. Raheja College of Arts and Commerce.

| | Waterfall Model, The Spiral Model, Software Prototyping, Other Ways of Categorizing Prototypes, Incremental Delivery, Atern/Dynamic Systems Development Method, Rapid Application Development, Agile Methods, Extreme Programming (XP), Scrum, Lean Software Development, Managing Iterative Processes, Selecting the Most Appropriate Process Model. Software Effort Estimation: Introduction, Where are the Estimates Done? Problems with Over- and Under-Estimates, The Basis for Software Estimating, Software Effort Estimation Techniques, Bottom up Estimating, The Top-down Approach and Parametric Models, Expert Judgement, Estimating by Analogy, Albrecht Function Point 12 6 Analysis, Function Points Mark II, COSMIC Full Function Points, COCOMO II: A Parametric Productivity Model, Cost Estimation, Staffing Pattern, Effect of Schedule Compression, Capers Jones Estimating Rules of Thumb. | |
|-----------|--|----------------|
| Unit III | Activity Planning: Introduction, Objectives of Activity Planning, When to Plan, Project Schedules, Projects and Activities, Sequencing and Scheduling Activities, Network Planning Models, Formulating a Network Model, Adding | 12 Lectures |
| MLEZ | the Time Dimension, The Forward Pass, Backward Pass, Identifying the Critical Path, Activity Float, Shortening the Project Duration, Identifying Critical Activities, Activity-on-Arrow Networks. Risk Management: Introduction, Risk, Categories of Risk, Risk Management Approaches, A | ACRU |
| HEJA COLL | Framework for Dealing with Risk, Risk Identification, Risk Assessment, Risk Planning, Risk Management, Evaluating Risks to the Schedule, Boehm's Top 10 Risks and Counter Measures, Applying the PERT Technique, Monte Carlo Simulation, Critical Chain Concepts, Resource Allocation: Introduction, Nature of Resources, Identifying Resource Requirements, Scheduling | CRUZ (M) |
| HE | Resources, Creating Critical Paths, Counting the Cost, Being Specific, Publishing the Resource Schedule, Cost Schedules, Scheduling Sequence | M |
| Unit IV | Monitoring and Control: Introduction, Creating the Framework, Collecting the Data, Review, Visualizing Progress, Cost Monitoring, Earned Value Analysis, Prioritizing Monitoring, Getting the Project Back to Target, Change Control, Software Configuration Management (SCM). Managing Contracts: Introduction, Types of Contract, Stages in Contract Placement, Typical Terms of a Contract, Contract Management, Acceptance. Managing People in Software Environments: Introduction, Understanding Behavior, Organizational Behavior: A Background, Selecting the Right Person for the Job, Instruction in the Best Methods, Motivation, The Oldham–Hackman Job Characteristics Model, Stress | 12 Lectures |
| Unit V | Working in Teams: Introduction, becoming a Team, Decision Making, Organization and Team Structures, Coordination Dependencies, Dispersed and Virtual Teams, Communication Genres, Communication Plans, Leadership. Software Quality: Introduction, The Place of Software Quality in Project Planning, Importance of Software Quality, Defining Software Quality, Software Quality Models, ISO 9126, Product and Process Metrics, Product versus Process Quality Management, Quality Management Systems, Process | 12 Lectures |

| Capability Models, Techniques to Help Enhance Software Quality, Testing, | |
|--|--|
| Software Reliability, Quality Plans | |

| Internet | on Things | |
|----------|--|----------------|
| Unit I | The Internet of Things: An Overview: The Flavor of the Internet of Things, The "Internet" of "Things", The Technology of the Internet of Things, Enchanted Objects, Who is Making the Internet of Things? Design Principles for Connected Devices: Calm and Ambient Technology, Magic as Metaphor, Privacy, Keeping Secrets, Whose Data Is It Anyway? Web Thinking for Connected Devices, Small Pieces, Loosely Joined, First-Class Citizens on The Internet, Graceful Degradation, and Affordances. Internet Principles: Internet Communications: An Overview, IP,TCP, The IP Protocol Suite (TCP/IP), UDP, IP Addresses, DNS, Static IP Address Assignment, Dyn amic IP Address Assignment, IPv6, MAC Addresses, TCP and UDP Ports, An Example: HTTP Ports, Other Common Ports, Application Layer Protocols, HTTP, | 12 Lectures |
| G | HTTPS: Encrypted HTTP, Other Application Layer Protocols | 5 |
| Unit II | Thinking About Prototyping: Sketching, Familiarity, Costs versus Ease of Prototyping, Prototypes and Production, Changing Embedded Platform, Physical Prototypes and Mass Personalization, climbing into the Cloud, Open Source versus Closed Source, Why Closed? Why Open? Mixing Open and Closed Source, Closed Source for Mass Market Projects, Tapping into the Community. Prototyping Embedded Devices: Electronics, Sensors, Actuators, Scaling Up the Electronics, Embedded Computing Basics, Microcontrollers, System-on-Chips, Choosing Your Platform, Arduino, developing on the Arduino, Some Notes on the Hardware, Openness, Raspberry Pi, Cases and Extension Boards, Developing on the Raspberry Pi, Some Notes on the Hardware, Openness. | 12 Lectures |
| Unit III | Prototyping the Physical Design: Preparation, Sketch, Iterate, and Explore, No digital Methods, Laser Cutting, Choosing a Laser Cutter, Software, Hinges and Joints, 3D Printing, Types of 3D Printing, Software, CNC Milling, Repurposing/Recycling. Prototyping Online Components: Getting Started with an API, Mashing Up APIs, Scraping, Legalities, writing a New API, Clockodillo, Security, implementing theAPI,Using CurltoTest, Going Further, Real-Time Reactions, Polling, Comet, Other Protocols, MQ Telemetry Transport, Extensible Messaging and Presence Protocol, Constrained Application Protocol. | 12 Lectures |
| Unit IV | Techniques for Writing Embedded Code: Memory Management, Types of Memory, Making the Most of Your RAM, Performance and Battery Life, Libraries, Debugging. Business Models: A Short History of Business Models, Space and Time, From Craft to Mass Production, The Long Tail of the Internet, | 12 Lectures |

| - | | |
|------------------|---|----------|
| | Learning from History, The Business Model Canvas, Who Is the | |
| | Business Model For? Models, Make Thing, Sell Thing, Subscriptions, | |
| | Customization, be a Key Resource, Provide Infrastructure: Sensor | |
| | Networks, take a Percentage, Funding an Internet of Things Startup, | |
| | Hobby Projects and Open Source, Venture Capital, Government | |
| | Funding, Crowdfunding, Lean Startups. | |
| Unit V | Moving to Manufacture: What Are You Producing? Designing Kits, | 12 |
| | Designing Printed circuit boards, Software Choices, The Design | Lectures |
| | Process, Manufacturing Printed Circuit Boards, Etching Boards, | |
| | Milling Boards. Assembly, Testing, Mass-Producing the Case and | |
| | Other Fixtures, Certification, Costs, Scaling Up Software, | |
| | Deployment, Correctness and Maintainability, Security, | |
| | Performance, User Community. | |
| | Ethics: Characterizing the Internet of Things, Privacy, Control, | |
| | Disrupting Control, Crowdsourcing, Environment, Physical Thing, | |
| | Electronics, Internet Service, Solutions, and The Internet of Things as | |
| | Part of the Solution, Cautious Optimism, and The Open Internet of | |
| | Things Definition. | 2 |

| Advanced | Web Programming |

| | 0° 77. | |
|-------------------|---|----------------|
| Advanced V | Veb Programming | |
| Unit I Unit II | Introducing .NET: The .NET Framework, C#, VB, and the .NET Languages, The Common Language Runtime, The .NET Class Library. The C# Language: C# Language Basics, Variables and Data Types, Variable Operations, Object-Based Manipulation, Conditional Logic, Loops, Methods. Types, Objects, and Namespaces: The Basics About Classes, Building a Basic Class, Value Types and Reference Types, Understanding Namespaces and Assemblies, Advanced Class Programming. Web Form Fundamentals: Writing Code, Using the Code-Behind Class, | 12 Lectures |
| S. RAHE | Adding Event Handlers, Understanding the Anatomy of an ASP.NET Application, Introducing Server Controls, Using the Page Class, Using Application Events, Configuring an ASP.NET Application. Form Controls: Stepping Up to Web Controls, Web Control Classes, List Controls, Table Controls, Web Control Events and Auto Post Back, Validation, Understanding Validation, Using the Validation Controls, Rich Controls, The Calendar, The AdRotator, Pages with Multiple Views, User Controls and Graphics, User Controls, Dynamic Graphics, The Chart Control, Website Navigation: Site Maps, URL Mapping and Routing, The Sitemap Path Control, The Tree View Control, The Menu Control. | Lecture |
| Unit III | Error Handling, Logging, and Tracing: Avoiding Common Errors, Understanding Exception Handling, Handling Exceptions, Throwing Your Own Exceptions, Using Page Tracing State Management: Understanding the Problem of State, Using View State, Transferring Information Between Pages, Using Cookies, Managing Session State, Configuring Session State, Using Application State, Comparing State Management Options Styles, Themes, and Master Pages: Styles, Themes, Master Page Basics, Advanced Master Pages, | 12 Lectures |
| Unit IV | ADO.NET Fundamentals: Understanding Databases, Configuring Your Database, Understanding SQL Basics, Understanding the Data Provider Model, Using Direct Data Access, Using Disconnected Data Access. Data Binding: Introducing Data Binding, Using Single-Value Data | 12 Lectures |

| | Binding, Using Repeated-Value Data Binding, Working with Data Source Controls, | |
|--------|--|----------------|
| Unit V | The Data Controls : The Grid View, Formatting the Grid View, selecting a Grid View Row, Editing with the Grid View, Sorting and Paging the Grid View, Using Grid View Templates, The Details View and FormView | 12 Lectures |

| List o | f Practical |
|--------|--|
| 1. | Working with basic C# and ASP .NET |
| a. | Create an application that obtains four int values from the user and displays the product. |
| b. | Create an application to demonstrate string operations. |
| c. | Create an application that receives the (Student Id, Student Name, Course Name, Date of |
| | Birth) information from a set of students. The application should also display the |
| | Information of all the students once the data entered. |
| d. | Create an application to demonstrate following operations |
| | i. Generate Fibonacci series. ii. Test for prime numbers. |
| | iii. Test for vowels. iv. Use of for each loop with arrays |
| | v. Reverse a number and find sum of digits of a number. |
| 2. | Working with Object Oriented C# and ASP .NET |
| a. | Create simple application to perform following operations |
| | i. Finding factorial Value ii. Money Conversion |
| 2 | Iii. Quadratic Equation iv. Temperature Conversion |
| b. | Create simple application to demonstrate use of following concepts |
| | i. Function Overloading ii. Inheritance (all types) |
| 1 | iii. Constructor overloading iv. Interfaces |
| c | Create simple application to demonstrate use of following concepts |
| 11 | i. Using Delegates and events ii. Exception handling |
| - | I. Comp Delegates and events II. Exception numering |
| 3. | Working with Web Forms and Controls |
| a. | Create a simple web page with various sever controls to demonstrate setting and use of |
| - 8 | Their properties. (Example : AutoPostBack) |
| b. | Demonstrate the use of Calendar control to perform following operations. |
| 0. | a)Display messages in a calendar control b)Display vacation in a calendar control |
| | c) Selected day in a calendar control using style d) Difference between two calendar |
| | |
| | dates |
| c. | Demonstrate the use of Tree view control perform following operations. |
| | a) Tree view control and data list b) Tree view operations |
| | |
| 4. | Working with Form Controls |
| a. | Create a Registration form to demonstrate use of various Validation controls. |
| b. | Create Web Form to demonstrate use of Ad rotator Control. |
| c. | Create Web Form to demonstrate use User Controls. |
| 5. | Working with Navigation, Beautification and Master page. |
| | |
| a. | Create Web Form to demonstrate use of Website Navigation controls and Site Map. |

| с. | Create a web application to demonstrate various states of ASP.NET Pages. |
|--------|--|
| | |
| 6. | Working with Database |
| a. | Create a web application bind data in a multiline textbox by querying in another textbox. |
| b. | Create a web application to display records by using database. |
| с. | Demonstrate the use of Data list link control. |
| | |
| 7. | Working with Database |
| a. | Create a web application to display Databinding using dropdown list control. |
| b. | Create a web application for to display the phone no of an author using database. |
| с. | Create a web application for inserting and deleting record from a database. (Using Execute-Non Query). |
| 0 | |
| 8. | Working with data controls |
| a. | Create a web application to demonstrate various uses and properties of SqlDataSource. |
| b. | Create a web application to demonstrate data binding using Details View and Form View Control. |
| с. | Create a web application to display Using Disconnected Data Access and Databinding Using Grid View. |
| | |
| 9. | Working with Grid View control |
| a. | Create a web application to demonstrate use of Grid View control template and Grid View hyperlink. |
| b. | Create a web application to demonstrate use of grid View button column and grid View events. |
| с. | Create a web application to demonstrate Grid View paging and Creating own table format using Grid View. |
| ho has | |
| 10. | Working with AJAX and XML |
| a. | Create a web application to demonstrate reading and writing operation with XML. |
| b. | CreateawebapplicationtodemonstrateFormSecurityandWindowsSecuritywithproper Authentication and Authorization properties. |
| с. | Create a web application to demonstrate use of various Ajax controls. |
| | |
| 11. | Programs to create and use DLL |
| | 0. |
| | |

| Unit I | Introduction: What is Artificial Intelligence? Foundations of AI, history, | 12 |
| | the state of art AI today. | Lectures |
| | Intelligent Agents: agents and environment, good behavior, nature of | |
| | environment, the structure of agents | |
| Unit II | Solving Problems by Searching: Problem solving agents, examples | 12 |
| | problems, searching for solutions, uninformed search, informed search | Lectures |
| | strategies, heuristic functions. | |
| | Beyond Classical Search: local search algorithms, searching with on- | |
| 16 | deterministic action, searching with partial observations, online search | |
| | Agents and unknown environments. | |
| Unit III | Adversarial Search: Games, optimal decisions in games, alpha-beta | 12 |
| 0 | pruning, stochastic games, partially observable games, state-of-the-are | Lecture |
| A C(| game programs. | - |
| | Logical Agents: Knowledge base agents, The Wumpus world, logic, | - |
| 1 | propositional logic, propositional theorem proving, effective propositional | 5 |
| and the second s | model checking, agents based on propositional logic. | 10 |
| Unit IV | First Order Logic: Syntax and semantics, using First Order Logic, | 12 Locture |
| WH4 | Knowledge engineering in First Order Logic. | Lectures |
| S. | Inference in First Order Logic: propositional vs. First Order, unification | and the second |
| Unit V | and lifting, forward and backward chaining, resolution. | 12 |
| Unit V | Planning: Definition of Classical Planning, Algorithms for planningas state | Lectures |
| 10 | space search, planning graphs, other classical planning approaches, analysis | Lectures |
| 100 | of planning approaches, Time, Schedules and resources, hierarchical | |
| 2 | planning, Planning and Acting in Nondeterministic Domains, multiagent | |
| | planning, | |
| | Knowledge Representation: Categories and Objects, events, mental events | |
| | and objects, reasoning systems for categories, reasoning with default | |
| | information, Internet shopping world | <u> </u> |
| | | |

| 5. | Artificial Intelligence & Soft Computing for Beginners | Anandita Das Bhattacharjee | SPD | 1 st | 2013 |

| Practical | No | Details |
|-----------|-----|--|
| 1 | a | Write a program to implement depth first search algorithm. |
| | b | Write a program to implement breadth first search algorithm. |
| 2 | a | Write a program to simulate 4-Queen / N-Queen problem. |
| | b | Write a program to solve tower of Hanoi problem. |
| 3 | a | Write a program to implement alpha beta search. |
| 2 | b | Write a program for Hill climbing problem. |
| 4 | a | Write a program to implement A* algorithm. |
| ~ | b | Write a program to implement AO* algorithm. |
| 5 | a | Write a program to solve water jug problem. |
| -0 | b | Design the simulation of tic – tac – toe game using min-max algorithm. |
| 6 | a | Write a program to solve Missionaries and Cannibals problem. |
| | b | Design an application to simulate number puzzle problem. |
| 7 | a | Write a program to shuffle Deck of cards. |
| | b | Solve traveling salesman problem using artificial intelligence technique. |
| 8 | a | Solve the block of World problem. |
| | b | Solve constraint satisfaction problem |
| 9 | a | Derive the expressions based on Associative law |
| 1000 | b | Derive the expressions based on Distributive law |
| 10 | а | Write a program to derive the predicate. |
| | | (for e.g.: Sachin is batsman, batsman is cricketer) - > Sachin is Cricketer. |
| 0. | b | Write a program which contains three predicates: male, female, parent. Make rules |
| | 5 | for following family relations: father, mother, grandfather, grandmother, brother, |
| 1 | 6.0 | sister, uncle, aunt, nephew and niece, cousin. |
| | 0 | Question: |
| | | i. Draw Family Tree. |
| | | ii. Define: Clauses, Facts, Predicates and Rules with conjunction and disjunction |

Linux System Administration

| Unit I | Introduction to Red Hat Enterprise Linux: Linux, Open Source and Red | 12 |
|--------|---|----------|
| | Hat, Origins of Linux, Distributions, Duties of Linux System Administrator. | Lectures |
| | Command Line: Working with the Bash Shell, Getting the Best of Bash, | |
| | Useful Bash Key Sequences, Working with Bash History, Performing Basic | |
| | File System Management Tasks, Working with Directories, Piping and | |
| | Redirection, Finding Files | |

Compiled by Ms. Prajakta Joshi (Course Co-ordinator) L. S. Raheja College of Arts and Commerce.

| | System Administration Tasks: Performing Job Management Tasks, System and Process Monitoring and Management, Managing Processes withps, Sending Signals to Processes with the kill Command, using top to Show Current System Activity, Managing Process Niceness, Scheduling Jobs, Mounting Devices, Working with Links, Creating Backups, Managing Printers, Setting Up System Logging, Setting Up Rsyslog, Common Log Files, Setting UpLogrotate Managing Software: Understanding RPM, Understanding Meta Package Handlers, Creating Your Own Repositories, Managing Repositories, Installing Software with Yum, Querying Software, Extracting Files from RPM Packages | |
|-----------|---|----------------|
| Unit II | Configuring and Managing Storage: Understanding Partitions and Logical Volumes, Creating Partitions, Creating File Systems, File Systems Overview, Creating File Systems, Changing File System Properties, Checking the File System Integrity, Mounting File Systems Automatically Through fstab, Working with Logical Volumes, Creating Logical Volumes, Resizing Logical Volumes, Working with Snapshots, Replacing Failing Storage Devices, Creating Swap Space, Working with Encrypted Volumes | 12 Lectures |
| EJA COLLE | Connecting to the Network: Understanding Network Manager, Working with Services and Run levels, Configuring the Network with Network Manager, Working with system-config-network, Network Manager Configuration Files, Network Service Scripts, Networking from the Command Line, Troubleshooting Networking, SettingUpIPv6,ConfiguringSSH,EnablingtheSSHServer,Usingthe SSH Client, Using PuTTY on Windows Machines, Configuring Key-Based SSH Authentication, Using Graphical Applications with SSH, Using SSH Port Forwarding, Configuring VNC Server Access | |
| Unit III | Working with Users, Groups, and Permissions: Managing Users and Groups, Commands for User Management, Managing Passwords, Modifying and Deleting User Accounts, Configuration Files, Creating Groups, Using Graphical Tools for User, and Group Management, Using External Authentication Sources, the Authentication Process, sssd, nsswitch, Pluggable Authentication Modules, Managing Permissions, the Role of Ownership, Basic Permissions: Read, Write, and Execute, Advanced Permissions, Working with Access Control Lists, Setting Default Permissions with umask, Working with Attributes | 12 Lectures |
| Unit IV | Securing Server with iptables: Understanding Firewalls, Setting Up a Firewall with system-config-firewall, Allowing Services, Trusted Interfaces, Masquerading, Configuration Files, Setting Up a Firewall with iptables, Tables, Chains, and Rules, Composition of Rule, Configuration Example, Advanced iptables Configuration, Configuring Logging, The Limit Module, Configuring NAT Setting Up Cryptographic Services: Introducing SSL, Proof of Authenticity: The Certificate Authority, Managing Certificates with openssl, Creating a Signing Request, Working with GNU Privacy Guard, Creating GPG Keys, Key Transfer, Managing GPG Keys, Encrypting Files with GPG, GPG Signing, Signing RPM Files Configuring Server for File Sharing: What is NFS? Advantages and Disadvantages of NFS, Configuring NFS4, Setting Up NFSv4, Mounting an NFS Share, Making NFS Mounts Persistent, Configuring Automount, Configuring Samba, | 12 Lectures |

| Accessing Samba Shares, Offering FTP Services.Unit VConfiguring DNS and DHCP: Introduction to DNS, The DNS Hierarchy, DNS Server Types, The DNS Lookup Process, DNS Zone Types, Setting Up a DNS Server, Setting Up a Cache-Only Name Server, Setting Up a Primary Name Server, Setting Up a Secondary Name Server, Understanding DHCP, Setting Up a DHCP Server12 LecSetting Up a Mail Server: Using the Message Transfer Agent, the Mail Delivery Agent, the Mail User Agent, Setting Up Postfix as an SMTP Server, Working with Mutt, Basic Configuration, Internet Configuration, Configuring Dovecot for POP and IMAP | ture |
|--|------|
| DNS Server Types, The DNS Lookup Process, DNS Zone Types, Setting Up a DNS Server, Setting Up a Cache-Only Name Server, Setting Up a Primary Name Server, Setting Up a Secondary Name Server, Understanding DHCP, Setting Up a DHCP Server Setting Up a Mail Server: Using the Message Transfer Agent, the Mail Delivery Agent, the Mail User Agent, Setting Up Postfix as an SMTP Server, Working with Mutt, Basic Configuration, Internet Configuration, | ture |
| Up a DNS Server, Setting Up a Cache-Only Name Server, Setting Up a Primary Name Server, Setting Up a Secondary Name Server, Understanding DHCP, Setting Up a DHCP Server Setting Up a Mail Server: Using the Message Transfer Agent, the Mail Delivery Agent, the Mail User Agent, Setting Up Postfix as an SMTP Server, Working with Mutt, Basic Configuration, Internet Configuration, | ture |
| Primary Name Server, Setting Up a Secondary Name Server, Understanding DHCP, Setting Up a DHCP Server Setting Up a Mail Server: Using the Message Transfer Agent, the Mail Delivery Agent, the Mail User Agent, Setting Up Postfix as an SMTP Server, Working with Mutt, Basic Configuration, Internet Configuration, | |
| DHCP, Setting Up a DHCP Server Setting Up a Mail Server: Using the Message Transfer Agent, the Mail Delivery Agent, the Mail User Agent, Setting Up Postfix as an SMTP Server, Working with Mutt, Basic Configuration, Internet Configuration, | |
| Setting Up a Mail Server: Using the Message Transfer Agent, the Mail Delivery Agent, the Mail User Agent, Setting Up Postfix as an SMTP Server, Working with Mutt, Basic Configuration, Internet Configuration, | |
| Delivery Agent, the Mail User Agent, Setting Up Postfix as an SMTP Server, Working with Mutt, Basic Configuration, Internet Configuration, | |
| Server, Working with Mutt, Basic Configuration, Internet Configuration, | |
| | |
| Configuring Dovecot for POP and IMAP | |
| | |
| | |
| Configuring Apache on Red Hat Enterprise Linux: Configuring the | |
| Apache Web Server, creating a Basic Website, Understanding the Apache | |
| Configuration Files, Apache Log Files, Working with Virtual Hosts, | |
| Securing the Web Server with TLS Certificates, Configuring | |
| Authentication,SettingUpAuthenticationwith.htpasswd,Configuring LDAP | |
| Authentication, Setting Up MySQL | |

Enterprise Java

| Unit I | Understanding Java EE: What is an Enterprise Application? What is java | 12 |
|--------|--|----------|
| | enterprise edition? Java EE Technologies, Java EE evolution, Glassfish | Lectures |
| | server | |
| | Java EE Architecture, Server and Containers: Types of System | |
| | Architecture, Java EE Server, Java EE Containers. | |
| | Introduction to Java Servlets: The Need for Dynamic Content, Java | |
| | Servlet Technology, Why Servlets? What can Servlets do? | |
| | Servlet API and Lifecycle: JavaServletAPI,TheServletSkeleton,The | |
| | Servlet LifeCycle, A Simple e Welcome Servlet | |
| | Working with Servlets: Getting Started, Using Annotations Instead of | |
| | Deployment Descriptor. | |
| | Working with Databases: What Is JDBC? JDBC Architecture, Accessing | |
| | | |

| | | I |
|----------|---|-----------------|
| | Database, The Servlet GUI and Database Example. | |
| Unit II | Request Dispatcher: Request dispatcher Interface, Methods of | 12 |
| | Request dispatcher, Request dispatcher Application. | Lectures |
| | COOKIES: Kinds of Cookies, Where Cookies Are Used? Creating | |
| | Cookies Using Servlet, Dynamically Changing the Colors of A Page | |
| | SESSION: What Are Sessions? Lifecycle of Http Session, Session | |
| | Tracking With Servlet API, A Servlet Session Example | |
| | Working with Files: Uploading Files, Creating an Upload File Application, | |
| | Downloading Files, Creating a Download File Application. Working with | |
| | Non-Blocking I/O: Creating a Non-Blocking Read Application, Creating | |
| | The Web Application, Creating Java Class, Creating Servlets, Retrieving | |
| | The File, Creatingindex.jsp | |
| Unit III | Introduction To Java Server Pages: Why use Java Server Pages? | 12 |
| | Disadvantages Of JSP, JSPv\s Servlets, Life Cycle of a JSP Page, How | Lectures |
| | does a JSP function? How does JSP execute? About Java Server Pages | |
| | Getting Started With Java Server Pages: Comments, JSP Document, | |
| | JSP Elements, JSP GUI Example. | |
| | Action Elements: Including other Files, Forwarding JSP Page to Another | |
| 1 | Page, Passing Parameters for other Actions, Loading a JavaBean. | |
| 1 | Implicit Objects, Scope and El Expressions: Implicit Objects, Character | |
| ~ | Quoting Conventions, Unified Expression Language [Unified El], | 5 |
| - | Expression Language. | |
| Unit IV | Java Server Pages Standard Tag Libraries: What is wrong in using | 12 |
| 0 | JSP Scriptlet Tags? How JSTL Fixes JSP Scriptlet's Shortcomings? | Lectures |
| | Disadvantages Of JSTL, TagLibraries. | 0 |
| Unit V | Introduction To Enterprise Java beans: Enterprise Bean Architecture, | 12 |
| | Benefits of Enterprise Bean, Types of Enterprise Bean, Accessing | Lectures |
| 111 | Enterprise Beans, Enterprise Bean Application, Packaging Enterprise Beans | - |
| AHE | Working with Session Beans: When to use Session Beans? Types of | Contraction (1) |
| 20 | Session Beans, Remote and Local Interfaces, Accessing Interfaces, | |
| 1000 | Lifecycle of Enterprise Beans, Packaging Enterprise Beans, Example of | |
| 24 | Stateful Session Bean, Example of Stateless Session Bean, Example of | |
| | Singleton Ses <mark>sionBeans.</mark> | - T |
| 13 | Working with Message Driven Beans: Lifecycle of a Message Driven | - |
| 200 | Bean, Uses of Message Driven Beans, The Message Driven Beans Example. | |
| 1 | Interceptors: Request and Interceptor, Defining An Interceptor, Around | |
| | Invoke Method, Applying Interceptor, Adding An Interceptor To An | |
| | Enterprise Bean, Build and Run the Web Application. | |
| | Java Naming and Directory Interface: What is Naming Service? What is | |
| | Directory Service? What is Java Naming and Directory interface? Basic | |
| | Lookup, JNDI Namespace in Java EE, Resources and JNDI, Data source | |
| | Resource Definition in Java EE. | 1 |

| 3. | Advanced Java Programming | Uttam Kumar Roy | Oxford Press | | 2015 |

| List of | ² Practical |
|---------|---|
| 1. | Implement the following Simple Servlet applications. |
| a. | Create a simple calculator application using servlet. |
| b. | Create a servlet for a login page. If the username and password are correct then it says message "Hello <username>" else a message "login failed"</username> |
| с. | Create a registration servlet in Java using JDBC. Accept the details such as Username, Password, Email, and Country from the user using HTML Form and store the registration details in the database. |
| • | |
| 2. | Implement the following Servlet applications with Cookies and Sessions. |
| a. | Using Request Dispatcher Interface create a Servlet which will validate the password entered by the user, if the user has entered "Servlet" as password, then he will be Forwarded to Welcome Servlet else the user will stay on the index.html page and an error message will be displayed. |
| b. | Create a servlet that uses Cookies to store the number of times user has visited Servlet. |
| с. | Create a servlet demonstrating the use of session creation and destruction. Also check Whether the user has visited this page first time or has visited earlier also using sessions. |
| 3. | Implement the Servlet IO and File applications. |
| a. | Create a Servlet application to upload and download a file. |
| b. | Develop Simple Servlet Question Answer Application using Database. |
| c. | Create simple Servlet application to demonstrate Non-Blocking Read Operation. |
| | |
| 4. | Implement the following JSP applications. |
| a. | Develop a simple JSP application to display values obtained from the use of intrinsic Objects of various types. |
| b. | Develop simpleJSP application top ass values from one page to another with Validations. (Name-txt, age-txt, hobbies-checkbox, email-txt, gender-radio button). |
| c. | Create a registration and login JSP application to register and authenticate the user Based on username and password using JDBC. |
| 5. | Implement the following JSP JSTL and EL Applications. |
| a. | Create an html page with fields, eno, name, age, desg, salary. Now on submit this data to a JSP page which will update the employee table of database with matching eno. |
| b. | Create a JSP page to demonstrate the use of Expression language. |
| c. | Create a JSP application to demonstrate the use of JSTL. |
| 6. | Implement the following EJB Applications. |
| | |
| a. | Create a Currency Converter application using EJB. |

| Develop simple shopping cart application using EJB [Stateful Session Bean]. |
|---|
| Develop simple snopping cart application using EJD [Staterul Session Deall]. |
| Implement the following FID appliestions with different types of Deepe |
| Implement the following EJB applications with different types of Beans. |
| Develop simple EJB application to demonstrate Servlet Hit count using Singleton |
| Session Beans. |
| Develop simple visitor Statistics application using Message Driven Bean [Stateless |
| Session Bean]. |
| Develop simple Marks Entry Application to demonstrate accessing Database using |
| EJB. |
| |
| Implement the following JPA applications. |
| Develop a simple Inventory Application Using JPA. |
| Develop a Guestbook Application Using JPA. |
| Create simple JPA application to store and retrieve Book details. |
| 2. |
| Implement the following JPA applications with ORM and Hibernate. |
| Develop a JPA Application to demonstrate use of ORM associations. |
| Develop a Hibernate application to store Feedback of Website Visitor in MySQL |
| Database. |
| Develop a Hibernate application to store and retrieve employee details in MySQL |
| Database. |
| |
| Implement the following Hibernate applications. |
| Develop an application to demonstrate Hibernate One- To -One Mapping Using |
| Annotation. |
| DevelopHibernateapplicationtoenterandretrievecoursedetailswithORMMapping. |
| Develop a five page web application site using any two or three Java EE Technologies. |
| |
| |
| |

| Next Gen | eration Technologies | |
|----------|--|----------------|
| Unit I | Big Data: Getting Started, Big Data, Facts About Big Data, Big Data Sources, Three Vs of Big Data, Volume, Variety, Velocity, Usage of Big Data, Visibility, Discover and Analyze Information, Segmentation and Customizations, Aiding Decision Making, Innovation, Big Data Challenges, Policies and Procedures, Access to Data, Technology and Techniques, Legacy System and Big Data ,Structure of Big Data, Data Storage, Data Processing, Big Data Technologies NoSQL: SQL, NoSQL, Definition, A Brief History of NoSQL, ACID vs. BASE, CAP Theorem (Brewer's Theorem), The BASE, NoSQL Advantage sand Disadvantages, Advantages of No SQL, Disadvantages of NoSQL, SQL vs. NoSQL Databases, Categories of NoSQL Databases Introducing MongoDB: History, MongoDB Design Philosophy, Speed, Scalability, | 12 Lectures |
| | and Agility, Non-Relational Approach, JSON-Based Document Store, Performance vs. Features, Running the Database Anywhere, SQL Comparison | |

L. S. Raheja College of Arts and Commerce.

| | Programming, Schema Evolution | |
|------------|--|----------------|
| | Using MongoDB Shell: Basic Querying, Create and Insert, Explicitly Creating Collections, Inserting Documents Using Loop, Inserting by Explicitly Specifying _id, Update, Delete, Read, Using Indexes, Stepping Beyond the Basics, Using Conditional Operators, Regular Expressions, MapReduce, aggregate(), Designing an Application's Data Model, Relational Data Modeling and Normalization, MongoDB Document Data Model Approach | |
| | MongoDB Architecture: Core Processes, mongo, mongo, mongos, MongoDB Tools, Standalone Deployment, Replication, Master/Slave Replication, Replica Set, Implementing Advanced Clustering with Replica Sets, Sharding, Sharding Components, Data Distribution Process, Data Balancing Process, Operations, Implementing Sharding, Controlling Collection Distribution (Tag-Based Sharding), Points to Remember When Importing Data in a Sharded Environment, Monitoring for Sharding, Monitoring the Config Servers, Production Cluster Architecture, Scenario 1, Scenario 2, Scenario 3, Scenario 4 | |
| Unit III | MongoDB Storage Engine: Data Storage Engine, Data File(Relevant for | 12 |
| AHEJA COLL | MMAPv1), Namespace (.ns File), Data File (Relevant for Wired Tiger), Read sand Writes, How Data Is Written Using Journaling, GridFS – The MongoDB File System, The Rationale of GridFS, GridFSunder the Hood, Using GridFS, Indexing, Types of Indexes, Behaviors and Limitations | Lectures |
| | MongoDB Use Cases: Use Case 1 -Performance Monitoring, Schema | - |
| EJA | Design, Operations, Sharding, Managin gtheData, UseCase2–Social Networking, Schema Design, Operations, Sharding | M), |
| G. RAH | MongoDB Limitations: MongoDB Space Is Too Large (Applicable for MMAPv1), Memory Issues (Applicable for Storage Engine MMAPv1), 32- bit vs. 64-bit, BSON Documents, Namespaces Limits, Indexes Limit, Capped Collections Limit - Maximum Number of Documents in a Capped Collection, Sharding Limitations, Shard Early to Avoid Any Issues, Shard Key Can't Be Updated, Shard Collection Limit, Select the Correct Shard Key, Security Limitations, No Authentication by Default, Traffi c to and from MongoDB Isn't Encrypted, Write and Read Limitations, Case- Sensitive Queries, Type- Sensitive Fields, No JOIN, Transactions, MongoDB Not Applicable Range | MUAR |
| | MongoDB Best Practices: Deployment, Hardware Suggestions from the MongoDB Site, Few Points to be Noted, Coding, Application ResponseTimeOptimization, DataSafety, Administration, Replication Lag, Sharding, Monitoring | |
| Unit IV | The End of Disk? SSD and In-Memory Databases: The End of Disk?, Solid State Disk, The Economics of Disk, SSD-Enabled Databases, In- Memory Databases, TimesTen, Redis, SAP HANA, VoltDB, Oracle 12c "in-Memory Database, Berkeley Analytics Data Stack and Spark, Spark Architecture | 12 Lectures |
| | jQuery: Introduction, Traversing the DOM, DOM Manipulation with jQuery, Events, Ajax with jQuery, jQuery Plug-ins, jQuery Image Slider | |

| Unit V | JSON: Introduction, JSON Grammar, JSON Values, JSON Tokens, | 12 |
|--------|--|----------|
| | Syntax, JSON vs XML, Data Types, Objects, Arrays, Creating JSON, | Lectures |
| | JSON Object, Parsing JSON, Persisting JSON, Data Interchange, JSON | |
| | PHP, JSON HTML, JSONP | |

| Sr. No. | Title | Author/s | Publisher | Edition | Year |

| 2 | |

T.Y.B.Sc. IT Semester VI

| Software | e Quality Assura <mark>nce</mark> | - |
|----------|---|----------------|
| Unit I | Introduction to Quality: Historical Perspective of Quality, What is Quality? (Is it a fact or perception?), Definitions of Quality, Core Components of Quality, Quality View, Financial Aspect of Quality, Customers, Suppliers and Processes, Total Quality Management (TQM), Quality Principles of Total Quality Management, Quality Management Through Statistical Process Control, Quality Management Through Cultural Changes, Continual (Continuous) improvement cycle, Quality in Different Areas, Benchmarking and Metrics, Problem Solving Techniques, Problem Solving Software Tools. Software Quality: Introduction, Constraints of Software Product Quality Assessment, Customer is a King, Quality and Productivity Relationship, Requirements of a Product, organization Culture, Characteristics of Software, Software Development Process, Types of Products, Schemes of Criticality Definitions, Problematic Areas of Software Has Defects? Processes Related to Software Quality, Quality Management System Structure, Pillars of Quality Management System, and Important Aspects of Quality Management. | 12 Lectures |
| Unit II | Fundamentals of testing: Introduction, Necessity of testing, What is testing? Fundamental test process, The psychology of testing, | 12 |

| | Historical Perspective of Testing, Definitions of Testing, Approaches to Testing, Testing During Development Life Cycle, Requirement Traceability Matrix, Essentials of Software Testing, Workbench, Important Features of Testing Process, Misconceptions About Testing, Principles of Software Testing, Salient Features of Good Testing, Test Policy, Test Strategy or Test Approach, Test Planning ,Testing Process and Number of Defects Found in Testing, Test Team Efficiency, Mutation Testing, Challenges inTesting, TestTeam Approach, Process Problems Faced by Testing, Cost Aspect of Testing, Establishing Testing Policy, Methods, Structured Approach to Testing, Categories of Defect, Defect, Error, or Mistake in Software, Developing Test Strategy, Developing Testing Methodologies (Test Plan), Testing Process, Attitude Towards Testing (Common People Issues), Test Methodologies/Approaches, People Challenges in Software Testing, Raising Management Awareness f or Testing, Skills Required by Tester, Testing throughout the software life cycle, Software development models, Test lavels | Lectures |
|-------------|--|----------------|
| UnitII | Test levels, Test types, the targets of testing, Maintenance testing | 10 |
| HEJA COLLEN | Unit Testing: Boundary Value Testing: Normal Boundary Value Testing, Robust Boundary Value Testing, Worst-Case Boundary Value Testing, Special Value Testing, Examples, Random Testing, Guidelines for Boundary Value Testing, Equivalence Class Testing: Equivalence Classes, Traditional Equivalence Class Testing, Improved Equivalence Class Testing, Edge Testing, Guidelines and Observations. Decision Table–Based Testing: Decision Tables, Decision Table Techniques, Cause-and-Effect Graphing, Guidelines and Observations, Path Testing: Program Graphs, DD-Paths, Test Coverage Metrics, Basis Path Testing, Guide lines and Observations ,Data Flow Testing: Define/Use Testing, Slice-Based Testing, Program Slicing Tools. | 12 Lectures |
| Unit IV | Software Verification and Validation: Introduction, Verification, Verification Workbench, Methods of Verification, Types of reviews the basis of Stage Phase, Entities involved in verification, Reviews in testing lifecycle, Coverage in Verification, Concerns of Verification, Validation, Validation Workbench, Levels of Validation, Coverage in Validation, Acceptance Testing, Management of Verification and Validation,Softwaredevelopmentverificationandvalidationactivities. V-test Model: Introduction, V-model for software, testing during Proposal stage, Testing during requirement stage, Testing during test Planning phase, Testing during design phase, Testing during coding, VV Model, Critical Roles and Responsibilities. | 12 Lectures |
| Unit V | Levels of Testing: Introduction, Proposal Testing, Requirement Testing, Design Testing, Code Review, Unit Testing, Module Testing, integration Testing. Big-bang Testing, Sandwich Testing, Critical Path First, Sub System Testing, System Testing, Testing Stages. Special Tests: Introduction, GUI testing, Compatibility Testing, Security Testing, Performance Testing, Volume Testing, Stress Testing, Recovery Testing, Installation Testing, Requirement Testing, Regression Testing, Error Handling Testing, Manual Support Testing, Intersystem Testing, Control Testing, Smoke Testing, Ad | 12 Lectures |

hoc Testing, Parallel Testing, Execution Testing, Operations Testing, Compliance Testing, Usability Testing, Decision Table Testing, Documentation Testing, Training testing, Rapid Testing, Control flow graph, Generating tests on the basis of Combinatorial Designs, State Graph, Risk Associated with New Technologies, Process maturity level of Technology, Testing Adequacy of Control in New technology usage, Object Oriented Application Testing, Testing of Internal Controls, COTS Testing, Client Server Testing, Web Application Testing, Mobile Application Testing, ebusiness ecommerce Testing, Agile Development Testing, Data Warehousing Testing.

*** ₹ 36/- on ₹ 1, 00,000/- Policy towards YUVA RAKSHA GROUP INSURANCE SCHEME BY ORIENTAL INSURANCE COMPANY.

The Policy will cover the following:

- Road / Railway Accident
- Injury during sports
- Natural Calamity such as riots / earthquakes etc.
- Any other accident

The student will be eligible the following as compensation as per the rules and on satisfactory submission of the documents:

- In case of permanent disability: up to ₹ 1,00,000/-
- Hospitalization as per bills subject to maximum of ₹ 1,00,000/-
- In case of the unfortunate death of the student, parents will get compensation up to ₹ 1,00,000/-
- In other cases, as per rules.

Parents and students are requested to note that the application to the Insurance Company for claiming the compensation will have to be forwarded through the Principal of the college with complete documents and within the time frame prescribed.

Document Verification Fees: Additional fees of ₹ 400/- to be paid by the students those who have not passed the HSC examinations from Maharashtra State Board of Secondary and Higher Secondary Education.

9.10.2859: Refund of Tuition, Development and all other fees after cancellation of admissions:

The candidates who have taken admission in under graduate courses in Govt. colleges, in Govt. aided and unaided courses conducted by affiliated colleges, and recognized Institutions may request for refund of fees after applying in writing for cancellation of their admission to the course. The refund of fees as applicable shall be made on or before the 30th day after the date of cancellation and thereafter. The percentage of fees for the course shall be refunded to the candidate after deducting charges as follows:

| (i) | (ii) | (iii) | (iv) | (v) | (vi) |
|--|--|--|---|---|--|
| Prior to Commence ment of academic term and instructio n of the course | Up to 20 days after commencem ent of the academic term of the course | From 21st day up to 50 days After Commence ment of the academic term of the Course | From 51st day up to 80 days after the commence ment of academic term of the course or August 31st | From September 1st to September 30th | After September 30 th |

Table – 1: Fees Deduction on cancellation of admission

Compiled by Ms. Prajakta Joshi (Course Co-ordinator) L. S. Raheja College of Arts and Commerce.

| | | | | whichever is earlier | | |
|-----------|---------------------|---|---|---|---|--|
| Deduction | ₹ 500/- Lump Sum | 20% of the total Amount of fees. | 30% of the total Amount of fees. | 50% of the total Amount of fees. | 60% of the total Amount of fees. | 100% of the total Amount of fees. |

Note: The total amount considered for the refund of fees from the commencement of academic term of the courses including the following:

- ii) The fee charged towards group insurance and all fee components to be paid as University share (including Vice-Chancellor fund, University fee for sports and cultural activities, E-charge, disaster management fund, exam. Fee and Enrollment fee) are non-refundable if payment is made by the college prior to the date of cancellation.
- iii) Fee collected for identity card and Library card, admission form and prospectus, enrollment and any other course specific fee are not refundable after the commencement of the academic term.
- iv) All refundable deposits (Laboratory, Caution Money and Library etc.) shall be fully returned at the time of cancellation.

Provided that wherever admissions are made through centralized admission process for professional and / or for any other courses by other competent Authorities, the Refund Rules are applicable if specified by such authorities (as per the rules of relevant agencies) for the 1st year admission. In case of admission to subsequent years of the course, 0.2859 is applicable for cancellation of admission.

Provided further that this refund rule is concurrent with the rules and guidelines of other professional statutory bodies appointed for admission for relevant courses.

Further that 0.2859-A & 0.2859-B have been repealed and the amended 0.2859 relating to the refund of Tuition Fees, Development and all other fees after cancellation of admission for the Under Graduate Courses has been brought into force with effect from the academic year 2008-2009.

10.1R:8433: The definitions of the key terms used in the Choice Based Credit System Introduced from the academic year 2011-12 are as under: <u>Program</u>:

A **Program** is a set of program that are linked together in an academically meaningful way and generally ends with the award of a Certificate or Diploma or Degree depending on the level of knowledge attained and the total duration of study. (for ex **B.A., B.Sc. and B.Com. are Programs.)**

Program

A '**program**' corresponds to the word 'course' used in many universities. A program is essentially a constituent of a 'program' and may be conceived of as a composite of several learning topics taken from a certain knowledge domain, at a certain level. All the learning topics included in a program must necessarily have academic coherence, that is, there must be a common thread linking the various components of a program. A number of linked programs considered together are in practice, a 'program'.

Credit Point:

Credit Point refers to the 'Workload' of a learner and is an index of the number of learning hours deemed for a certain segment of learning. These learning hours may include a variety of learning activities like reading, reflecting, discussing, attending lectures / counseling sessions, watching especially prepared videos, writing assignments, preparing for examinations, etc. Credits assigned for a single program always pay attention to how many hours it would take for a learner to complete a single program successfully. A single program should have, by and large a program may be assigned anywhere between 2 to 8 credit points wherein 1 credit is construed as corresponding to approximately 30 to 40 learning hours.

Credit completion and Credit accumulation:

Credit completion or Credit acquisition shall be considered to take place <u>after</u> the learner has successfully cleared all the evaluation criteria with respect to a single program. Thus, a learner who successfully completes a 4 CP (Credit Point) program may be considered to have collected or acquired 4 credits. His level of performance above the minimum prescribed level (viz. grades / marks obtained) has no bearing on the number of credits collected or acquired. A learner keeps on adding more and more credits as he completes successfully more and more programs. Thus the learner 'accumulates' program wise credits.

Credit Bank:

The process of accumulating Credits over a period of time, leads to the idea of a 'Credit Bank'. Conceptually, a Credit Bank in simple terms refers to stored and dynamically updated information regarding the number of Credits obtained by any given learner along with details regarding the program/s for which Credit has been given, the program-level, nature, etc. In addition, all the information regarding the number of Credits transferred to different programs or credit exemptions given may also be stored with the individual's history. In short, this would involve maintaining all the Credit–related transactions of an individual. Credit Banking, when practiced would go a long way in facilitating credit transfers and learner mobility.

<u>O. 5974</u>

Duration of the B.A., B.Com. and B.Sc. program will be of 3 years in the Semester pattern i.e. from Sem. I to Sem. VI. Bachelor of Commerce (Accounting & Finance) will be a THREE (03) year Program comprising SIX (06) Semesters i.e. each year will be divided into 2 semesters.

The degree will be awarded to a learner who successfully completes 120 credits of the program in period of 3 to 6 years from the year of enrollment to Semester I.

If a learner does not earn 120 credits in 12 semesters from the year of enrolment to semester I, he/she may at his/her option transfer his/her performance in the existing/new program after establishing equivalence between old and new syllabus. Such a performance transfer will be decided by the Board of Studies / Ad-hoc Board / Ad hoc Committee of the concerned course. The admission to the program will be governed by the existing rules.

11.1SCHEME OF EXAMINATION

The University of Mumbai has introduced the **Choice Based Semester and Grading System**from the academic year 2011-2012 for all the programs offered by the Faculty of Commerce, Faculty of Arts and Faculty of Science for all their Undergraduate Programs including the unaided or self-financing programs. The **Scheme of Examination** is as explained in brief and further details can be obtained from the Chairperson Examination Department or the Vice Principals. You may also refer to the University Circular no. UG/144 of 2011 dated June 14, 2011 and subsequent circulars for getting more information about the scheme of examination as applicable.

SCHEME OF EXAMINATION: As Applicable Today to All the Undergraduate Courses Under Faculty of Commerce.

Students / Learners of the BAF program are required to offer 40 courses each of 3 credits over the six semesters. Each course will be evaluated for 100 marks. The performance of the learner shall be evaluated in two components: Internal Assessment of 25 marks by way of continuous evaluation and Semester End Examination of 75 marks by conducting the theory examination.

INTERNAL ASSESSMENT: - Internal Assessment is defined as the assessment of the learners on the basis of continuous evaluation as envisaged in the credit based system by way of participation of learners in various academic and its correlated activities in the given semester of the program. A) Internal Assessment – 25 marks

| Sr. No. | Particulars | Marks |
|------------|---|----------|
| 1 | ONE periodical class test to be conducted in the given semester | 20 Marks |
| 2 | Active participation in routine class instructional deliveries and overall conduct as a responsible learner, mannerism and articulation and exhibit of leadership qualities in organizing related academic activities. | 05 Marks |

Courses with practical's (for Theory Component) - 50 Marks

| Sr. No | Sr. No Evaluation type | |
|--------|------------------------------------|----|
| 1 | Semester End Practical Examination | |
| | Journal | 05 |
| | Viva –voce | 05 |

| Laboratory Work | 40 |
|-----------------|----|

SEMESTER END EXAMINATION: - It is defined as the examination of the learners on the basis of performance in the semester end theory / written examinations.

B) Semester End Examinations - 75 Marks

- I. Duration Theses examinations shall be of 2½ Hours duration.
- II. Question Program Pattern: -
 - 1) There shall be five questions each of 15 marks.
 - 2) All questions shall be compulsory with internal choice within the questions.
 - Question may be subdivided into sub-questions a, b, c... and the allocation of marks depend on the weightage of the topic.

The Pattern of the Question Paper may change as per the instructions from the approved bodies of the University.

12.1ASSESSMENT OF SEMESTER I TO SEMESTER IV:

The assessment of **Part 'A' i.e. Internal Assessment and Part 'B' i.e. Semester End Examination** for Semesters I to IV shall be processed by the Colleges / Institutions of their learner on behalf of the University of Mumbai. The Mumbai University will set the question papers and colleges/institutions conduct the examinations, assess the answer books and declare the result of the learner. The College / Institution will issue the grade cards to the learner after the conversion of marks into grade as per the procedure mentioned in the manual. The format of the grade card will be as prescribed by the University so as to maintain the uniformity across the all colleges for the examinations conducted by the colleges on behalf of the University.

13.1ASSESSMENT OF SEMESTER V and SEMESTER VI:

The assessment of <u>Part 'A' i.e. Internal Assessment</u> for Semesters V & VI shall be processed/conducted by the Colleges / Institutions of their learners admitted to the programme while the University of Mumbai shall conduct the assessment of **Part 'B' i.e. Semester End Examination** for Semesters V & VI. The Internal Assessment marks of learners appearing for Semesters V & VI shall be submitted to the University by the respective colleges/ Institutions before the commencement of respective Semester End Examinations. The Semester End Examinations for Semesters V & VI shall be conducted by the University and the results shall be declared after processing the internal assessment and the marks awarded to the learners. The grade card shall be issued by the University after converting the marks into grades. The overall performance of the learner will be taken into account before declaring the result of the learner by the University i.e. overall result / performance of the learner will be based on the performance of the learner at Semester I, Semester III, Semester IV, Semester V and Semester VI Examinations.

Compiled by Ms. Prajakta Joshi (Course Co-ordinator) L. S. Raheja College of Arts and Commerce.

THE MARKS OF THE INTERNAL ASSESSMENT SHOULD NOT BE DISCLOSED TO THE STUDENTS TILL THE RESULTS OF THE CORRESPONDING SEMESTER IS DECLARED.

14.1<u>R.8436</u> PASSING STANDARD AND PERFORMANCE GRADING:

PASSING STANDARD

The learners to pass a programme shall have to obtain a minimum of 40% marks in aggregate for each programme where the programme consists of Internal Assessment & Semester End Examination. The learners shall obtain minimum of 40% marks (i.e. 10 out of 25) in the Internal Assessment and 40% marks in Semester End Examination (i.e. 30 Out of 75) separately, to pass the programme and minimum of Grade E in the project component, wherever applicable to pass a particular semester. A learner will be said to have passed the programme if the learner passes the Internal Assessment & Semester End Examination together.

15.1PERFROMANCE GRADING:

The PERFORMANCE GRADING of the learners shall be on the SEVEN-point ranking system as under:

| Grade | Marks | Grade Points |
|------------------------|---------------|--------------|
| 0 | 70 & above | 7 |
| А | 60 to 69.99 | 6 |
| В | 55 to 59.99 | 5 |
| С | 50 to 54.99 | 4 |
| D | 45 to 49.99 | 3 |
| E | 40 to 44.99 | 2 |
| F (Fa <mark>il)</mark> | 39.99 & below | 1 |

The performance grading shall be based on the aggregate performance of Internal Assessment and Semester End Examination.

<u>R: 8437</u> CARRY FORWARDS OF MARKS IN CASE OF A LEARNER WHO FAILS IN THE INTERNAL ASSESSMENT AND/OR SEMESTER END ASSESSMENT IN ONE OR MORE COURSES:

- 1) A learner who PASSES in the Internal Examination but FAILS in the Semester End Examination of the programme shall reappear for the Semester End Examination of that programme. However his/her marks of the Internal Examinations shall be carried over and he/she shall be entitled for grade obtained by him/her on passing.
- 2) A learner who PASSES in the Semester End Examination but FAILS in the Internal Assessment of the programme shall reappear for the Internal Examination of that programme. However his/her marks of the Semester End Examination shall be carried over and he/she shall be entitled for grade obtained by him/her on passing.

16.1EXAMINATION PATTERN OF THE SEMESTER END ATKT EXAMINATION

22.1R. 8447 Revaluation: Norms, Rules, Regulations and procedure for Verification and Revaluation

shall be as per the existing ordinances and regulation & VCD of the University. (vide Circular No. Exam. /Photo & Rev./Univ./VCD/ 4637 of 2010)

PHOTOCOPY REVALUATION OF THE ASSESSED ANSWER BOOK/S:

The University of Mumbai by the directives by Hon. Vice Chancellor vide the VCD no. **Exam/Photo & Rev./College/VCD/4636 of 2010 dated April 5 2010** has provided the facility of Verification, Revaluation and for obtaining the Xerox copy of the assessed answer books. Please note that Applying for Photocopy of the answer book/s and Applying for Revaluation will be two independent processes and separate application will have to be made by the candidate for obtaining the Photocopy of the answer book/s and for revaluation of the answer book/s. However, applying for photocopy of the answer book /s or having photocopy of the answer book/s shall not be a pre-requisite for applying for revaluation of the answer book on the said course. The student can apply independently for revaluation or photocopy or both simultaneously.

Procedure for obtaining the Photocopy of the Assessed Answer book/s.

- 1. This facility, thus provided, shall be for **THEORY PAPERS ONLY** of all the examinations conducted by the college / institution on behalf of the University in the current session.
- 2. Under these rules applying for the Photocopy/ies of answer-books shall not be permitted in respect of the scripts of practical examination / term-work / sessional work / project work / dissertation / internal assessment / term work (including theory part) and in Viva voce /oral / practical examinations.
- 3. The Photocopy/ies shall be sought by submitting an application in the prescribed form (available with college) along with the non-refundable fee of ₹100/- per answer book by the examinee within seven (7) working days from the date of the declaration of result of the examination or issue of the statement of marks by the college / institution, whichever is later. The examinee/s belonging to reserved categories shall be granted 50% concession in fee.
- 4. Incomplete application form shall be rejected without assigning any reason whatsoever and the fees paid along with the application form shall neither be refunded nor will any representation be entertained.
- 5. No application after the due date will be entertained on any ground whatsoever.
- 6. The College/Institution/Department shall endeavor to supply Photocopy/ies of answer books as far as possible within fifteen (15) working days from the date of receipt of application for photocopy/ies of the answer book/s.
- 7. The Photocopy/ies shall be handed over to the applicant examinee in person only and under no circumstances to any other person.
- 8. On receipt of Photocopy/ies the applicant examinee shall be the sole custodian of it and under any circumstances the examinee shall not part with the custody/possession of the same and also shall not use the same for any other purpose/s.

9. If the examinee is found guilty of indulging in any unfair act/attempt he/she shall be liable Compiled by Ms. Prajakta Joshi (Course Co-ordinator)

L. S. Raheja College of Arts and Commerce.

to be tried before the Unfair Means Inquiry Committee of the college and the decision taken by the authorities based on the recommendation of the said committee shall be final.

23.1PROCEDURE FOR REVALUATION OF THE ASSESSED ASNWER BOOK/S In case of discrepancy in the Assessed Answer book

On receipt of the photocopy if the discrepancy of following nature (listed below) is noticed by the examinee, he/ she should apply to the Principal in the prescribed form along with the said photocopy and copy of the question paper within three (03) working days from the date of publication of the notice by the Principal of the respective college as per the provisions hereinabove.

- i) Mistake in totaling
- ii) ii) Non assessment of a question / sub-question

If required after due verification, the Principal of respective college shall make necessary rectification in the marks allotted to the said course and consequently in the result of the candidate without charging any further fee for necessary rectification.

On rectification of the result as per the provisions above, the candidate can apply for revaluation within seven (7) working days from the date of receipt of the rectified result, if he/she was not eligible to apply for revaluation of the said answer book under Rule 29 herein below mentioned and only by such rectification becomes eligible for revaluation in the said course, course to other limitations contained herein.

The examinee is free to apply for Photocopy/ies of answer books of as many courses as he / she so desires.

REVALUATION OF THE ANSWER BOOK/S: RULES AND PROCEDURE:

- This revaluation facility shall be for theory papers only of all the examinations conducted by the college on behalf of the University for the respective current session.
- A candidate can apply for the revaluation of the answer book of the course only if he/she has secured at least 20% of the total marks in that course or 40% of the marks required for passing in the said course, whichever is less or the grade equivalent to the above criteria where grades are assigned to the theory papers.
- The non-refundable prescribed a fee of ₹ 260/- per course per answer book for the purpose
 of revaluation shall be paid by the examinee within seven (07) working days from the date
 of the declaration of the result of the respective examination or from the date on which the
 college issued the statement of marks, whichever is later. The examinees from the reserved
 categories shall be given fifty per cent (50%) concession, provided a certified copy of the
 caste certificate is enclosed.
- The revised marks obtained by a candidate after revaluation, as accepted by the Principal of

the respective college shall be taken into account for the purpose of amendment of his results only and the said result shall be communicated to the student/s by the Principal of the respective college.

• The whole process of revaluation shall be completed as far as possible within a period of thirty (30) days from the date of receipt of the application for revaluation by the college / institution.

THE PHOTO COPY/COPIES OF THE REVALUATED ANSWER-BOOK/S SHALL NOT BE PROVIDED TO THE EXAMINEES

CAN THE STUDENT BE ADMITTED TO THE NEXT HIGHER CLASS PENDING THE RESULT OF VERIFICATION / REVALUATION?

- 1. Pending the process of revaluation, and course to the availability of the seats in the college, the student may be admitted to the next higher class to which he could have been admitted if he/she had passed in the said examination or had been granted A.T.K.T. for admission to the next class in the original examination as per the rules applicable for the stream and faculty of his education, as per the following norms:
- 2. The student may be admitted to the next higher class to which he could have been admitted if he/she had passed in the said examination or had been granted A.T.K.T. for admission to the next class in the original examination as per the rules applicable for the stream and faculty if he/she had originally obtained required passing marks in the papers in which he/she had applied for revaluation,
- 3. The college shall be entitled to charge a fee of ₹ 260/- at the time of granting admission to such students to the next class before declaration of the result of the revaluation,
- 4. Such admission shall be provisional; and automatically stands cancelled on receipt of the result of revaluation process, if the student is not declared passed in the requisite number of the courses on revaluation which would entitle him/her to take admission in the next higher class, and in such case the fees originally collected by the college or any part of the same shall not be refunded,
- 5. In case if the student is declared to have passed in the requisite number of the courses on revaluation which would entitle him/her to take admission in the next higher class as per the Ordinances / regulations, the provisional admission will be regularized.
- 6. In case of the reserved category students or other students who are entitled to get fee concession, on appropriating the amount equal to the amount of fees which the college can collect from the student and the balance amount shall be refunded to the student at the time of confirmation and continuation of his/her admission.
- 7. In case of other students, the said amount shall be deducted from the total fees which the college or the institution is entitled to collect from the student as per the rules applicable.
- 8. Pending the declaration of the result of the revaluation, the students who have taken

admission to next higher class, as mentioned above, shall be allowed to appear at the examination to the next class and their results of the next examinations shall be declared only on their passing in the requisite number of the courses on revaluation which would entitle them to take admission in the next class; and in case the students does not succeed

in passing in such requisite number of courses, their admission to the examinations of the next class, their performance and results of the same shall be treated as null and void.

The details of the procedure can be obtained from the examination department of the college.

28.1RULES & REGULATIONSRELATED TO ATTENDANCE AS PER ORDINANCE 6086 OF UNIVERSITY OF MUMBAI:

Given below in brief are the rules, regulations about the requirement of attendance and the procedure to be followed by the college and/or the student who is detained. Detail circular available on University website. **Ordinance 6086 relating to the attendance for learners**

- There shall be the Attendance Committee, for smooth conduct of this ordinance, in every college/institute/Department of the University comprising of at least three members (to be nominated from other departments in case of the University Department having less than 3 teachers), the Vice-Principal/ Senior Teacher (Convener) and at least two more teachers ensuring representation of the concerned faculties, nominated by the Principal/Director/Head.
- 2) Every bonafide learner shall ordinarily be allowed to keep terms for the given semester in a program of his/her enrolment, only if he/she fulfils at least seventy five present (75%) of the attendance taken as an average of the total number of lectures practical's, tutorials together etc. wherein short and/or long excursions/field visits/study tours organized by the college and supervised by the teachers as envisaged in the syllabus shall be credited to his attendance for the total no of periods which are otherwise delivered on the material day/s Further it mandatory for every learner to have min 50% attendance for each course & overall attendance has to be 75%.
- 3) The same ratio shall be applied for computing the attendance of the learners by crediting the number of missed while extracurricular/co-curricular periods which are participating in an 14 activity/competition/camp/workshop/convention/symposium/seminar etc. where the said learner is officially representing the college/ University/ District/ State/ Country with the permission of the Principal/ Director/ Head of the College/ Institute/ University Department or by the direction of the University Officer as the case may be wherein for the purpose of computing the average attendance the periods missed for what is envisaged here-in above, at Sr. No 2, shall be deemed to have been attended by the said learner.
- 4) Without prejudice to what is stated here-in-above, the Principal/Director/Head of the concerned College/Institute/Department of the University shall be the competent authority to condone the absence of any learner further up to additional 25%, if deemed fit and on recommendation of the attendance committee of the said college/ Institute/Department of the University, wherein it is mandatory on the said committee to do natural justice by giving personal hearing to every learner falling short of minimum attendance for keeping terms and recommending case by case to the competent authority having verified the genuineness and gravity of the problem that justifies the learner to remain absent, which generally shall be limited to his own sickness, sickness of his parent, death of his parent etc. supported by valid evidence, documentary or otherwise.
- 5) The attendance committee will ensure that the attendance records are maintained in order and that the warning letters are issued to the defaulting learners at least twice in every semester & that in the first week of every month for the previous month defaulters list it displayed on college notice board. If the students are falling short of attendance while also displaying the list of defaulters declaring their respective attendance for the month. The defaulting learners should also be called (along with parent/guardian wherever necessary) to meet the Convener, attendance committee in the middle of the semester with a view to make the consequences adequately clear while understanding the difficulties if any and encouraging the learner to comply with the requirement of the attendance. Needless to say that the learners should be made aware of the provision of the ordinances for attendance at the time of admission and an undertaking may be obtained from them (countersigned by the parent/guardian wherever necessary) assuring regular attendance while understanding the consequences of defaulting.

- 6) At the end of the semester on recommendation of the attendance committee the Principal/Director/Head of the college/Institute/ University Department shall display list of the learners who are not allowed to keep terms, allowing them to appeal to the Principal/Director/Head of the College/Institute/Department of the University within 3 days from the date of display of the notice. After disposing the appeals, the Principal/Director/Head shall intimate the same to the In-charge of Examinations/the Controller of examinations to withdraw the examination forms of such defaulting learner under intimation to those learners ensuring that this communication reaches the concerned at least 10 working days before the commencement of the respective examinations.
- 7) The learners whose terms are not granted by the college/institute/department of the University can appeal to the controller of examinations, if desired, in a prescribed form and by paying fee prescribed by the Management Council within 3 days from the receipt of the intimation and that the controller of examinations shall arrange a hearing of the learners along with their concerned Principals/Director/Heads of the Department, represented in person or through a teacher nominated by them before the committee (one each for every faculty) nominated by the Management Council comprising of 3 members including the convener. The respective committees shall convey their decisions to the controller of examinations which shall be final and binding on the learners once accepted and communicated by the controller of examinations.
 (The existing Ordinances 0.119, 0.120 & 0.125 are repealed)

| B | bandwidth: | A measurement of the amount of data that can be transmitted over a network at any given time. The higher the network's bandwidth, the greater the volume of data that can be transmitted. |
| B | BCP: | Business Continuity Plan, or "BCP," is a set of documents, instructions, and procedures which enable a business to respond to accidents, disasters, emergencies, and/or threats without any stoppage or hindrance in its key operations. It is also called a business resumption plan, disaster recovery plan, or recovery plan. |
| В | BI: | Business Intelligence - A recognized industry term for organizational analytics, including historical, current, and predictive views of business operations. To learn more please click here. |
| В | binary file: | A file that cannot be read by standard text editor programs like Notepad or Simple Text. Examples: documents created by applications such as Microsoft Word or WordPerfect or DOS files with the extension ".com" or ".exe". |

| D | Distant | |
|-----|---------------|--|
| В | BinHex: | A common file format for Macintosh computers; it enables a |
| | | binary file to be transferred over the Internet as an ASCII file. |
| | | Using a program like Stuffit, a file can be encoded and |
| | | renamed with an ".hqx" extension. The recipient uses a |
| | | similar program to decode the file. |
| В | bit: | A binary digit (either 0 or 1); it is the most basic unit of data |
| | | that can be recognized and processed by a computer. |
| В | blended | Instruction that combines aspects of both face-to-face (F2F) |
| | learning: | and online learning experiences. An increasing number of |
| | | courses at OSU now offer this type of mix. |
| В | blog: | Refers to a weblog, a web page that contains journal-like |
| | RI | entries and links that are updated daily for public viewing. |
| В | bluetooth: | A wireless networking technology that allows users to send |
| | N | voice and data from one electronic device to another via radio |
| 5 | 0 | waves. |
| В | BMP: | Bitmap file; a common image format on Windows computers. |
| 100 | | Files of this type usually have the suffix ".bmp" as part of their |
| 1 | | name. |
| В | browser: | A program used to access World Wide Web pages. Examples: |
| 0 | | Firefox, Safari or Internet Explorer. |
| В | buffer: | On a multitasking system, a certain amount of RAM that is |
| - | | allocated as a temporary holding area so that the CPU can |
| 25 | | manipulate data before transferring it to a particular device. |
| В | byte: | A group of adjacent binary digits that a computer processes |
| | | as a unit to form a character such as the letter "C". A byte |
| | | consists of eight bits. |
| С | cable modem: | A special type of modem that connects to a local cable TV line |
| 24 | | to provide a continuous connection to the Internet. Like an |
| 1.2 | | analog modem, a cable modem is used to send and receive |
| 0.2 | | data, but the difference is that transfer speeds are much |
| | 2.9 | faster. A 56 Kbps modem can receive data at about 53 Kbps, |
| 1 | 0 | while a cable modem can achieve about 1.5 Mbps (about 30 |
| 3 | 2 | times faster). Cable modems attach to a 10Base-T Ethernet |
| | 0.0 | card inside your computer. |
| C | an chai | |
| С | cache: | Refers to: 1) a region of computer memory where frequently |
| | | accessed data can be stored for rapid access; or 2) an optional |
| | | file on your hard drive where such data also can be stored. |
| | | Examples: Internet Explorer and Firefox have options for |
| | | defining both memory and disk cache. The act of storing data |
| | | for fast retrieval is called "caching". |
| С | client-server | Refers to a connection between networked computers in |
| | technology: | which the services of one computer (the server) are |
| | | requested by the other (the client). Information obtained is |
| | | then processed locally on the client computer. |
| | 1 | i and proceeded to the one of the one of the official particular |

| С | cloud | A general term used to describe Internet services such as |
|--------|--------------|---|
| | computing: | social networking services (e.g., Facebook and Twitter), |
| | | online backup services, and applications that run within a |
| | | Web browser. Could computing also includes computer |
| | | networks that are connected over the Internet for server |
| | | redundancy or cluster computing purposes. |
| С | CMS: | 'Content Management System' is the collection of procedures |
| | | used to manage work flow in a collaborative environment. In |
| | | a CMS, data can be defined as nearly anything: documents, |
| | | movies, pictures, phone numbers, scientific data, and so |
| | 500 | forth. CMSs are frequently used for storing, controlling, |
| | 121 | revising, semantically enriching, and publishing |
| | - Ser. | documentation. Serving as a central repository, the CMS |
| | 2 | increases the version level of new updates to an already |
| | . 0 | existing file. Version control is one of the primary advantages |
| | 8 | of a CMS. |
| С | cookie: | A small piece of information you may be asked to accept |
| ~ | | when connecting to certain servers via a web browser. It is |
| 1 | | used throughout your session as a means of identifying you. |
| 0 | | A cookie is specific to, and sent only to the server that |
| .0 | | generated it. |
| С | CSS: | Cascading Style Sheet; A set of rules that define how web |
| 1 | | pages are displayed using CSS, designers can create rules that |
| 2 | | define how page |
| D | data center: | A data center (data Centre / datacenter / datacenter) is a |
| | | facility used to house computer systems and associated |
| 10. | | components, such as telecommunications and storage |
| 5 | | systems. It generally includes redundant or backup power |
| 1.2 | | supplies, redundant data communications connections, |
| - U.S. | | environmental controls (e.g., air conditioning, fire |
| | 29 | suppression) and security devices. To learn more please |
| 1 | 0 | click here. |
| D | database: | A collection of information organized so that a computer |
| | - Sec | application can quickly access selected information; it can be |
| | 1 | thought of as an electronic filing system. Traditional |
| | | databases are organized by fields, records (a complete set of |
| | | fields), and files (a collection of records). Alternatively, in a |
| | | Hypertext database, any object (e.g., text, a picture, or a film) |
| | | can be linked to any other object. |
| D | decompress: | Opposite of compressing a file; the process of restoring the |
| | | file to its original size and format. The most common |
| | | programs for decompressing files are WinRAR for PC and |
| | | compatible computers (.zip files) and Stuffit Expander (.sit |
| | | files) for Macintosh computers. |
| | | |

| D | dofro are ortat | The process of roughting parts of a file to continuous asstant |
|----------------|-----------------|---|
| D | defragmentat | The process of rewriting parts of a file to contiguous sectors |
| D | ion: | on a hard drive to increase the speed of access and retrieval. |
| D | dial up | A connection from your computer that goes through a regular |
| | connection: | telephone line. You use special communications software to |
| | | instruct your modem to dial a number to access another |
| | | computer system or a network. May also be referred to as |
| _ | | "dial up networking". |
| D | DNS: | Domain Name System; a service for accessing a networked |
| | | computer by name rather than by numerical, (IP) address. |
| D | domain: | Part of an Internet address. The network hierarchy consists of |
| | 7- | domains and subdomains. At the top are a number of major |
| | No. | categories (e.g., com, edu, gov); next are domains within |
| | G.V | these categories (e.g., ohio-state); and then there are |
| | 0 | subdomains. The computer name is at the lowest level of the |
| | | hierarchy. |
| D | download: | The process of transferring one or more files from a remote |
| 43 | | computer to your local computer. The opposite action is |
| ~1 | | upload. |
| E | eLearning: | Electronic learning; applies to a wide scope of processes |
| 0 | | including Web-based learning, computer-based instruction, |
| 0 | | virtual classrooms, and digital collaboration. Content may be |
| 1 | | delivered in a variety of ways including via the Internet, |
| 100 | | satellite broadcast, interactive TV, and DVD- or CD-ROMs. |
| E | e-mail: | Electronic mail; the exchange of messages between users |
| and the second | | who have access to either the same system or who are |
| | | connected via a network (often the Internet). If a user is not |
| 100 | | logged on when a new message arrives, it is stored for later |
| 24 | | retrieval. |
| E S | encryption: | The manipulation of data to prevent accurate interpretation |
| | | by all but those for whom the data is intended. |
| E 🚽 | Ethernet: | A popular network technology that enables data to travel at |
| | 0 | 10 megabits per second. Campus microcomputers connected |
| | 25 | to a network have Ethernet cards installed that are attached |
| | 10 | to Ethernet cabling. An Ethernet connection is often referred |
| | 0 | to as a "direct connection" and is capable of providing data |
| | | transmission speeds over 500 Kbps. |
| E | extension: | A suffix preceded by a period at the end of a filename; used |
| | | to describe the file type. Example: On a Windows computer, |
| | | the extension ".exe" represents an executable file. |
| F | field: | A single piece of information within a database (e.g., an entry |
| | | for name or address). Also refers to a specific area within a |
| | | dialog box or a window where information can be entered. |
| | | |

| _ | | |
|-------|--------------------------|--|
| F | file: | A collection of data that has a name (called the filename). Almost all information on a computer is stored in some type of file. Examples: data file (contains data such as a group of records); executable file (contains a program or commands that are executable); text file (contains data that can be read using a standard text editor). |
| F | firewall: | A method of preventing unauthorized access to or from a particular network; firewalls can be implemented in both hardware and software, or both. |
| F | folder: | An area on a hard disk that contains a related set of files or alternatively, the icon that represents a directory or subdirectory. |
| F | font: | A complete assortment of letters, numbers, and symbols of a specific size and design. There are hundreds of different fonts ranging from businesslike type styles to fonts composed only of special characters such as math symbols or miniature graphics. |
| 1770 | fragmentatio n: | The scattering of parts of the same disk file over different areas of a disk; fragmentation occurs as files are deleted and new ones are added. |
| EJA C | FTP: | File Transfer Protocol; a method of exchanging files between computers via the Internet. A program like WS_FTP for IBM PC or compatibles or Fetch for Macintosh is required. Files can contain documents or programs and can be ASCII text or binary data. |
| GARA. | GIF: | Graphics Interchange Format; a format for a file that contains a graphic or a picture. Files of this type usually have the suffix ".gif" as part of their name. Many images seen on web pages are GIF files. |
| G | gigabyte (Gig or GB): | 1024 x 1024 x 1024 (2 to the 30th power) bytes; it's usually sufficient to think of a gigabyte as approximately one billion bytes or 1000 megabytes. |
| G | GPS: | Global Positioning System; a collection of Earth-orbiting satellites. In a more common context, GPS actually refers to a GPS receiver which uses a mathematical principle called "trilateration" that can tell you exactly where you are on Earth at any moment. |
| G | GUI: | Graphical user interface; a mouse-based system that contains icons, drop-down menus, and windows where you point and click to indicate what you want to do. All new Windows and Macintosh computers currently being sold utilize this technology. |

| | h a sa al a h a hún a s | The initial production provided increasing the second states of the seco |
|---|-------------------------|--|
| Н | handshaking: | The initial negotiation period immediately after a connection |
| | | is established between two modems. This is when the |
| | | modems agree about how the data will be transmitted (e.g., |
| | | error correction, packet size, etc.). The set of rules they agree |
| | | on is called the protocol. |
| Н | hard disk: | A storage device that holds large amounts of data, usually in |
| | | the range of hundreds to thousands of megabytes. Although |
| | | usually internal to the computer, some types of hard disk |
| | | devices are attached separately for use as supplemental disk |
| | | space. "Hard disk" and "hard drive" often are used |
| | 1.04 | interchangeably but technically, hard drive refers to the |
| | RI | mechanism that reads data from the disk. |
| Н | hardware: | The physical components of a computer including the |
| | N. | keyboard, monitor, disk drive, and internal chips and wiring. |
| | | Hardware is the counterpart of software. |
| н | header: | The portion of an e-mail message or a network newsgroup |
| 163 | | posting that precedes the body of the message; it contains |
| 1 | 0 | information like who the message is from, its subject, and the |
| 1 | | date. A header also is the portion of a packet that proceeds |
| 5 | | the actual data and contains additional information the |
| 5 | | receiver will need. |
| Н | host: | A computer accessed by a user working at a remote location. |
| 10 | | Also refers to a specific computer connected to a TCP/IP |
| 2 | | network like the Internet. |
| H | HTML: | HyperText Markup Language; a language used for creating |
| The second se | | web pages. Various instructions and sets of tags are used to |
| S. | | define how the document will look. |
| H 🛠 | HTTP: | HyperText Transfer Protocol; a set of instructions that defines |
| 1.22 | | how a web server and a browser should interact. Example: |
| - U 2 | | When you open a location (e.g., enter a URL) in your browser, |
| | 20 | what actually happens is an HTTP command is sent to the web |
| | 0 | server directing it to fetch and return the requested web |
| | 0.0 | page. |
| Н | hyperlink: | Connects one piece of information (anchor) to a related piece |
| | | of information (anchor) in an electronic document. Clicking |
| | | on a hyperlink takes you to directly to the linked destination |
| | | which can be within the same document or in an entirely |
| | | different document. Hyperlinks are commonly found on web |
| | | pages, word documents and PDF files. |
| 1 | laaS: | |
| I | 1003. | Infrastructure as a Service; In the most basic cloud-service |
| | | model, providers of laaS offer computers - physical or (more |
| | | often) virtual machines - and other resources. To learn more |
| | | please click here. |

| 1 | image map: | A graphic overlay that contains more than one area (or hot |
|-------|--------------|--|
| | | spot) which is clickable and links to another web page or anchor. Image maps provide an alternative to text links for |
| | | directing the user to additional information. |
| I | IMAP: | Internet Message Access Protocol. A method of accessing e- |
| | | mail messages on a server without downloading them to your |
| | | local hard drive; it is the main difference between IMAP and |
| | | POP3 which requires messages to be downloaded to a user's |
| | | hard drive before the message can be read. |
| I | Internet | A client program from Microsoft that comespre installed on |
| | Explorer: | most new PC or compatible computers; enables you to |
| | 18 | browse the World Wide Web. |
| I | Internet: | A worldwide network based on the TCP/IP protocol that can |
| | 0 | connect almost any make or model of popular computers |
| | 4. | from micros to supercomputers. Special programs called |
| 16 | 2 | "clients" enable users with a network connection to do things |
| 14 | 7 | like process e-mail or browse web sites using the familiar |
| 1 | | interface of a desktop computer. |
| 2 | IP address: | Internet Protocol address; every computer connected to the |
| 0 | | Internet has a unique identifying number. Example: |
| 0 | | 192.168.100.2. |
| 1 | Java: | A general purpose programming language commonly used in |
| - | | conjunction with web pages that feature animation. Small |
| 2.4.3 | | Java applications are called Java applets; many can be |
| | | downloaded and run on your computer by a Java-compatible |
| 1 | | browser like Firefox or Internet Explorer. |
| 1 | JavaScript: | A publicly available scripting language that shares many of |
| 977 | | the features of Java; it is used to add dynamic content |
| . (Ê | 1050 | (various types of interactivity) to web pages. |
| 1 😒 | JPEG: | Joint Photographic Experts Group; a graphics format which |
| 24 | | compresses an image to save space. Most images imbedded |
| | 5 | in web pages are GIFs, but sometimes the JPEG format is used |
| | 33 | (especially for detailed graphics or photographs). In some |
| | 28 | cases, you can click on the image to display a larger version |
| | | with better resolution. |
| К | K (kilobyte, | An abbreviation for kilobyte; it contains 1,024 bytes; in turn |
| | KB, or Kb): | 1,024 kilobytes is equal to one megabyte. |
| К | Kbps: | Kilobits per second; a measure of data transfer speed; one |
| | <u> </u> | Kbps is 1,000 bits per second. Example: a 28.8 Kbps modem. |
| К | keyword: | Most often refers to a feature of text editing and database |
| | | management systems; a keyword is an index entry that |
| | | correlates with a specific record or document. |
| К | knowledge | A database where information common to a particular topic |
| | base: | is stored online for easy reference; for example, a frequently- |

| | | asked questions (FAQ) list may provide links to a knowledge base. |
|----------|-----------------|--|
| L | LAN: | Local area network; a network that extends over a small area (usually within a square mile or less). Connects a group of computers for the purpose of sharing resources such as programs, documents, or printers. Shared files often are stored on a central file server. |
| L | link: | Another name for a hyperlink. |
| L | LINUX: | An open-source operating system that runs on a number of hardware platforms including PCs and Macintoshes. Linux is freely available over the Internet. |
| L | ListProcessor: | A program that manages electronic mailing lists; OIT is responsible for the List Processor software and also handles requests from the OSU community or new mailing lists. |
| L 4 | log in, log on: | The process of entering your username and password to gain access to a particular computer; e.g., a mainframe, a network or secure server, or another system capable of resource sharing. |
| r Col, | mail server: | A networked computer dedicated to supporting electronic mail. You use a client program like Microsoft Outlook for retrieving new mail from the server and for composing and sending messages. |
| S. RAHEJ | mailing list: | A collection of e-mail addresses identified by a single name; mailing lists provide a simple way of corresponding with a group of people with a common interest or bond. There are two main types of lists: 1) one you create within an e-mail program like Outlook that contains addresses for two or more individuals you frequently send the same message; and 2) a List serve type that requires participants to be subscribed (e.g., a group of collaborators, a class of students, or often just individuals interested in discussing a particular topic). |
| Μ | main memory: | The amount of memory physically installed in your computer. Also referred to as "RAM". |
| Μ | mainframe: | A very large computer capable of supporting hundreds of users running a variety of different programs simultaneously. Often the distinction between small mainframes and minicomputers is vague and may depend on how the machine is marketed. |
| Μ | malware: | Software programs designed to damage or do other unwanted actions on a computer; common examples of malware include viruses, worms, Trojan horses, and spyware. |

| Μ | Microsoft | A group of operating systems for PC or compatible |
|----------------|---------------|---|
| | Windows: | computers; Windows provides a graphical user interface so |
| | | you can point and click to indicate what you want to do. |
| Μ | MIME: | Multipurpose Internet Mail Extensions; a protocol that |
| | | enables you to include various types of files (text, audio, |
| | | video, images, etc.) as an attachment to an e-mail message. |
| Μ | modem: | A device that enables a computer to send and receive |
| | | information over a normal telephone line. Modems can |
| | | either be external (a separate device) or internal (a board |
| | | located inside the computer's case) and are available with a |
| | 100 | variety of features such as error correction and data |
| | 120 | compression. |
| Μ | MPEG: | Motion Picture Experts Group; a high quality video format |
| | OX. | commonly used for files found on the Internet. Usually a |
| | 1 | special helper application is required to view MPEG files. |
| М | multimedia: | The delivery of information, usually to a personal computer, |
| 15 | | in a combination of different formats including text, graphics, |
| 1 | | animation, audio, and video. |
| M | multitasking: | The ability of a CPU to perform more than one operation at |
| 0 | | the same time; Windows and Macintosh computers are |
| 0 | | multitasking in that each program that is running uses the |
| - | | CPU only for as long as needed and then control switches to |
| 24 | | the next task. |
| N | network | A device that connects your computer to a network; also |
| and the second | adapter: | called an adapter card or network interface card. |
| N | network hub: | A common connection point for devices on a network. |
| Ν | network | Network security consists of the provisions and policies |
| 94) | security: | adopted by a network administrator to prevent and monitor |
| 100 | | unauthorized access, misuse, modification, or denial of the |
| 9. | | computer network and network-accessible resources. |
| | 2 | Network Security is the authorization of access to data in a |
| | 0 | network, which is controlled by a network |
| | Sec. | administrator. Dataprise uses state-of-the-art network |
| | 10 | security techniques while providing authorized personnel |
| | 0 | access to important files and applications. Every |
| | | organization's needs are different and hackers are always |
| | | adapting their techniques, so we are extremely serious about |
| | | staying up to date with the latest network security tools, |
| | | threats and industry developments. |
| N | network: | A group of interconnected computers capable of exchanging |
| | | information. A network can be as few as several personal |
| | | computers on a LAN or as large as the Internet, a worldwide |
| | | network of computers. |
| | 1 | I |

| | 1. | |
|----------|---------------|---|
| 0 | online: | A term that has commonly come to mean "connected to the |
| | | Internet". It also is used to refer to materials stored on a |
| | | computer (e.g., an online newsletter) or to a device like a |
| | | printer that is ready to accept commands from a computer. |
| Р | PaaS: | Platform as a Service, in the PaaS model, cloud providers |
| | | deliver a computing platform that typically including an |
| | | operating system, programming language execution |
| | | environment, database, and web server. |
| Р | packet: | A unit of transmission in data communications. The TCP/IP |
| | | protocol breaks large data files into smaller chunks for |
| | 100 | sending over a network so that less data will have to be re- |
| | 12 | transmitted if errors occur. |
| Р | page: | Refers to an HTML document on the World Wide Web or to a |
| | N. | particular web site; usually pages contain links to related |
| | | documents (or pages). |
| P | palette: | The range of colors a computer or an application is able to |
| 18 | | display. Most newer computers can display as many as 16 |
| 3 | | million colors, but a given program may use only 256 of them. |
| 2 | | Also refers to a display box containing a set of related tools |
| 0 | | within a desktop publishing or graphics design program. |
| PG | password: | A secret combination of characters used to access a secured |
| | passer | resource such as a computer, a program, a directory, or a file; |
| 1 | | often used in conjunction with a username. |
| P | PDF: | Portable Document Format; a type of formatting that enables |
| 1.1.1 | | files to be viewed on a variety computers regardless of the |
| | | program originally used to create them. PDF files retain the |
| S. | | "look and feel" of the original document with special |
| 24 | | formatting, graphics, and color intact. You use a special |
| | | program or print driver (Adobe Distiller or PDF Writer) to |
| 10 | | convert a file into PDF format. |
| Р | peer-to-peer: | A type of connection between two computers; both perform |
| 1 | | computations, store data, and make requests from each |
| | 2 | other (unlike a client-server connection where one computer |
| | 0.5 | makes a request and the other computer responds with |
| | ~5 | information). |
| D | Dorl | |
| Р | Perl: | Practical Extraction and Report Language; a programming |
| | | language that is commonly used for writing CGI scripts used |
| | | by most servers to process data received from a client |
| D | | browser. |
| Р | pixel: | Stands for one picture element (one dot on a computer |
| | | monitor); commonly used as a unit of measurement. |
| Р | program: | A set of instructions that tells a computer how to perform a |
| | | specific task. |

| Р | protocol: | A set of rules that regulate how computers exchange |
|---------|---------------------|---|
| | | information. Example: error checking for file transfers or POP for handling electronic mail. |
| Ρ | proxy: | Refers to a special kind of server that functions as an intermediate link between a client application (like a web browser) and a real server. The proxy server intercepts requests for information from the real server and whenever possible, fills the request. When it is unable to do so, the request is forwarded to the real server. |
| Q | QuickTime: | A video format developed by Apple Computer commonly used for files found on the Internet; an alternative to MPEG. A special viewer program available for both IBM PC and compatibles and Macintosh computers is required for playback. |
| R 77770 | RAM: | Random Access Memory; the amount of memory available for use by programs on a computer. Also referred to as "main memory". Example: A computer with 8 MB RAM has approximately 8 million bytes of memory available. Contrast to ROM (read-only memory) that is used to store programs that start your computer and do diagnostics. |
| N ALL | record: | A set of fields that contain related information; in database type systems, groups of similar records are stored in files. Example: a personnel file that contains employment information. |
| RAHA. | registry: | A database used by Windows for storing configuration information. Most 32-bit Windows applications write data to the registry. Although you can edit the registry, this is not recommended unless absolutely necessary because errors could disable your computer. |
| R | remote desktop: | A Windows feature that allows you to have access to a Windows session from another computer in a different location (XP and later). |
| R | RGB: | Red, green, and blue; the primary colors that are mixed to display the color of pixels on a computer monitor. Every color of emitted light can be created by combining these three colors in varying levels. |
| R | RJ-45 connector: | An eight-wire connector used for connecting a computer to a local-area network. May also be referred to as an Ethernet connector. |
| R | ROM: | Read Only Memory; a special type of memory used to store programs that start a computer and do diagnostics. Data stored in ROM can only be read and cannot be removed even when your computer is turned off. Most personal computers have only a few thousand bytes of ROM. Contrast to RAM |

| | | (random access or main memory) which is the amount of memory available for use by programs on your computer. |
|-----|----------------|---|
| | | |
| | | |
| R | router: | A device used for connecting two Local Area Networks (LANs); |
| | | routers can filter packets and forward them according to a |
| 6 | | specified set of criteria. |
| S | SaaS: | Software as a Service; a software delivery model in which software and associated data are centrally hosted on the |
| | | cloud. SaaS is typically accessed by users using a thin client via |
| | 01 | a web browser. |
| S | SATA: | Serial Advanced Technology Attachment or Serial ATA. An |
| | 1 | interface used to connect ATA hard drives to a computer's |
| | | motherboard that provides a better, more efficient interface; |
| | 08 | Serial ATA is likely to replace the previous standard, Parallel |
| 14 | 27 | ATA (PATA), which has become dated. |
| S | satellite | A method of data transmission; the sender beams data up to |
| 2 | transmission: | an orbiting satellite and the satellite beams the data back |
| 0 | | down to the receiver. |
| 5.0 | search | A tool that searches documents by keyword and returns a list |
| t. | engine: | of possible matches; most often used in reference to programs such as Google that are used by your web browser |
| | | to search the Internet for a particular topic. |
| S | secure server: | A special type of file server that requires authentication (e.g., |
| 1 | | entry a valid username and password) before access is |
| 10. | | granted. |
| s 🥯 | server: | A computer that is responsible for responding to requests |
| 10 | | made by a client program (e.g., a web browser or an e-mail |
| - 8 | | program) or computer. Also referred to as a "file server". |
| S | SMTP: | Simple Mail Transfer Protocol; a method of handling outgoing |
| 6 | S | electronic mail. |
| S | software: | Any program that performs a specific function. Examples: |
| | ×2. | word processing, spreadsheet calculations, or electronic mail. |
| Т | table: | With reference to web design, a method for formatting |
| ' | | information on a page. Use of tables and the cells within also |
| | | provide a way to create columns of text. Use of tables vs |
| | | frames is recommended for helping to make your web site |
| | | ADA-compliant. |
| Т | TCP/IP: | Transmission Control Protocol/Internet Protocol; an agreed |
| | | upon set of rules that tells computers how to exchange |
| | | information over the Internet. Other Internet protocols like |
| | | FTP, Gopher, and HTTP sit on top of TCP/IP. |

| Т | telnet: | A generic term that refers to the process of opening a remote interactive login session regardless of the type of computer you're connecting to. |
|-----------|------------------------|---|
| Т | Trojan horse: | A harmless-looking program designed to trick you into thinking it is something you want, but which performs harmful acts when it runs. |
| T | twisted pair cable: | A type of cable that is typically found in telephone jacks; two wires are independently insulated and are twisted around each other. The cable is thinner and more flexible than the coaxial cable used in conjunction with 10Base-2 or 10Base-5 standards. Most Ohio State UNITS telephone jacks have three pairs of wires; one is used for the telephone and the other two can be used for 10Base-T Ethernet connections. |
| U Ere | UNIX: | A popular multitasking computer system often used as a server for electronic mail or for a web site. UNIX also is the leading operating system for workstations, although increasingly there is competition from Windows NT which offers many of the same features while running on a PC or compatible computer. |
| CO 1 | upload: | The process of transferring one or more files from your local computer to a remote computer. The opposite action is download. |
| S. RAHEJA | URL: | Uniform Resource Locator; a means of identifying resources on the Internet. A full URL consists of three parts: the protocol (e.g., FTP, gopher, http, nntp, telnet); the server name and address; and the item's path. The protocol describes the type of item and is always followed by a colon (:). The server name and address identifies the computer where the information is stored and is preceded by two slashes (//). The path shows where an item is stored on the server and what the file is called; each segment of the location s preceded by a single slash (/). Examples: The URL for the Dataprise home page is http://www.dataprise.com. |
| U | USB: | Universal Serial Bus; a connector on the back of almost any new computer that allows you to quickly and easily attach external devices such as mice, joysticks or flight yokes, printers, scanners, modems, speakers, digital cameras or webcams, or external storage devices. Current operating systems for Windows and Macintosh computers support USB, so it's simple to install the device drivers. When a new device is connected, the operating system automatically activates it and begins communicating. USB devices can be connected or disconnected at any time. |

| U | username: | A name used in conjunction with a password to gain access to |
|---------|------------------|---|
| | | a computer system or a network service. |
| V | virtual reality: | An artificial environment created with computer hardware and software to simulate the look and feel of a real environment. A user wears earphones, a special pair of gloves, and goggles that create a 3D display. Examples: manipulating imaginary 3D objects by "grabbing" them, taking a tour of a "virtual" building, or playing an interactive game. |
| v ~ 77 | virtualization: | Virtualization is the creation of a virtual (rather than actual) version of something, such as a hardware platform, operating system, a storage device or network resources. In hardware virtualization, the term host machine refers to the actual machine on which the virtualization takes place; the term guest machine, however, refers to the virtual machine. Likewise, the adjectives host and guest are used to help distinguish the software that runs on the actual machine. The software or firmware that creates a virtual machine on the host hardware is called a hypervisor or Virtual Machine Monitor. |
| HEJA C | virus: | A program intended to alter data on a computer in an invisible fashion, usually for mischievous or destructive purposes. Viruses are often transferred across the Internet as well as by infected diskettes and can affect almost every type of computer. Special antivirus programs are used to detect and eliminate them. |
| S. R. A | VoIP: | Voice over Internet Protocol; a means of using the Internet as the transmission medium for phone calls. An advantage is you do not incur any additional surcharges beyond the cost of your Internet access. |
| V | VPN: | Virtual Private Networking; a means of securely accessing resources on a network by connecting to a remote access server through the Internet or other network. |
| W | WAN: | Wide Area Network; a group of networked computers covering a large geographical area (e.g., the Internet). |
| W | WAP: | Wireless Application Protocol; a set of communication protocols for enabling wireless access to the Internet. |
| W | wi-fi: | Wireless Fidelity; A generic term from the Wi-Fi Alliance that refers to of any type of 802.11 network (e.g., 802.11b, 802.11a, dual-band, etc.). Products approved as "Wi-Fi Certified" (a registered trademark) are certified as interoperable with each other for wireless communications. |
| W | Windows: | A casual way of referring to the Microsoft Windows operating systems. |

| 14/ | wingloss | |
|-----|--------------|---|
| W | wireless | The ability to access the Internet without a physical network |
| | (networking) | connection. Devices such as cell phones and PDAs that allow you to send and receive e-mail use a wireless Internet |
| | | , |
| | | connection based on a protocol called WAP (Wireless |
| | | Application Protocol). At this point, web sites that contain |
| | | wireless Internet content are limited, but will multiply as the |
| | | use of devices relying on WAP increases. |
| W | WLAN: | Wireless Local Area Network; the computers and devices that |
| | | make up a wireless network. |
| W | World Wide | A hypertext-based system of servers on the Internet. |
| | Web: | Hypertext is data that contains one or more links to other |
| | d a | data; a link can point to many different types of resources |
| | C.V | including text, graphics, sound, animated files, a network |
| | 0 | newsgroup, a telnet session, an FTP session, or another web |
| | 4. | server. You use a special program called a "browser" (e.g., |
| | 62 | Firefox or Internet Explorer) for viewing World Wide Web |
| 14 | 3 C | pages. Also referred to as "WWW" or "the web". |
| W | worm: | A program that makes copies of itself and can spread outside |
| ~ | à l | your operating system worms can damage computer data |
| 0 | | and security in much the same way as viruses. |
| W | WPA: | Wi-Fi Protected Access; a standard designed to improve on |
| - | | the security features of WEP. |
| W | WWW: | An abbreviation for World Wide Web. |
| Х | XHTML: | Extensible Hypertext Markup Language. A spinoff of the |
| | | hypertext markup language (HTML) used for creating Web |
| - | | pages. It is based on the HTML 4.0 syntax, but has been |
| 100 | | modified to follow the guidelines of XML and is sometimes |
| | | referred to as HTML 5.0. |
| Х | XML: | Extensible Markup Language; A markup language for coding |
| - 9 | | web documents that allows designers to create their own |
| P | | customized tags for structuring a page. |
| Z | zip: | A common file compression format for PC or compatibles; the |
| | A. | utility WinZip or Winrar is used for compressing and |
| | 10 | decompressing files. Zipped files usually end with a ".zip" file |
| | | extension. A special kind of zipped file is self-extracting and |
| | | ends with an ".exe" extension. Macintosh OSX also supports |
| | | the .zip format and has tools that can compress and |
| | | decompress zip files. |
| Z | zoom: | The act of enlarging a portion of an onscreen image for fine |
| | 1 | detail work; most graphics programs have this capability. |
